Product Overview

The Cortex®-A9 series PPC-A9-170-C (PN: CS12102F170) is a rugged, high-quality industrial panel PC. It features a 17” multi-point capacitive touch screen with a resolution of 1280 x 1024 pixels.

Key Applications

- Human Machine Interface HMI
- Process Control
- Process Monitoring

- HMI
- Infotainment
- Predictive Maintenance
- Machine Learning
- Machine Vision
- Automotive applications
- ATM...

The PPC-A9-170-C Industrial Panel PC is based around the powerful CS-SOM-iMX6Q System on Module (SoM), powered by the i.MX6Q Arm® Cortex®-A9 quad-core Application Processor (APU). The i.MX6Q APU represents the latest achievement in integrated multimedia applications processors, delivering high-performance computing, an abundance of integrated peripherals, and high power efficiency.

This product also features a broad range of connectivity options, providing a high level of scalability for various use cases. It is the perfect solution for power-constrained applications on the Edge, acting as a robust control unit for collecting, processing, and aggregating field data. The i.MX6Q APU is part of NXP's EdgeVerse™ edge computing platform.

The NXP i.MX6UL APU does not generate extensive heat, so even the thin aluminum housing on PPC version delivers sufficient thermal dissipation. With its junction temperature from -40 to +125°C, the APU itself is well suited for extended temperature range in both automotive and factory environments.

Ordering Options

Chipsee products can be customized during the ordering process. The product will be shipped with the pre-installed factory defaults if no extra requirements are specified. The table in the Hardware Features section provides information about the default options bundled with the product.

> **Note**
>
> You can order The PPC-A9-170-C Industrial Panel PC from the official **Chipsee Store** or from your nearest distributor.

Operating System

This product comes with a pre-installed OS of your choice. Please see the list below for the supported OSes, which can be also obtained from the Software Documentation section, along with the detailed installation instructions.

- Chipsee Linux*

- Android 4.3
- Android 6.0
- Android 8.0
- Ubuntu 12.04
- Ubuntu 14.04
- Debian

---

* Chipsee Linux is based on NXP Yocto framework that has been integrated with:

  1. Chipsee Hardware Test Application
  2. An initialization script for GPIO/Buzzer/Audio
  3. Multiple libraries, such as the `libQt5Sql` to develop Qt application with SQL
  4. Various packages, such as the `ntfs-3g` to use NTFS file system

> **Warning**
>
> The Software Documentation section provides a detailed instruction how to install different OS on your own. However, bear in mind that Chipsee can't take the responsibility of inadequate installation procedure. If you "brick" your device, please contact Chipsee Technical Support at **support@chipsee.com** for further assistance

Optional Features

The PPC-A9-170-C Industrial Panel PC does not include 4G/LTE module by default. The module is optional and can be selected at the Chipsee store during the ordering process.

> **Warning**
>
> Installation, repair, and maintenance tasks should be performed by trained personnel only.
> Chipsee does not bear any responsibility for damage caused by inadequate handling of the product.

Hardware Features

The PPC-A9-170-C Industrial Panel PC offers a board range of performance and connectivity options for scalable integration, providing expandability according to future needs. Some of the key features are listed in the table below.

PPC-A9-170-C	
CPU	iMX6Q, Arm® Cortex®-A9, 1GHz
RAM	2GB DDR3
eMMC	8GB
Storage	TF Card, Supports up to 32GB SDHC

PPC-A9-170-C	
Display	17" LCD, 1280 x 1024, High Brightness: 500cd/m^2
Touch	Capacitive Multi-Point Touch Screen
USB	4 x USB 2.0 HOST, 1 x USB OTG
LAN	1 x Channel 1000Mbps LAN
Audio	3.5mm Audio In/Out Connector, Internal 2W Speaker
Buzzer	Yes
RTC	Yes, Powered by CR2032 Button Battery
RS232	4 x RS232
RS485	Optional 2 x RS485[1]
CAN	Optional 2 x CAN
GPIO	Optional 4 x Channels Input and 4 x Channels Output
WiFi/BT	Integrated WiFi/BT Module
HDMI	1 x HDMI
SATA	1 x SATA II
Expansion Port	Optional, 10-pin expansion connector
4G/LTE	Optional, Not mounted by default
Power Input	From 15V to 36V
Current at 15V	2000mA Max (w/o 4G Module)
Power Consumption	20W Typical
Working Temperature	From -20°C to +70°C
OS	Multiple Choices (Operating System)
Dimensions	392 x 330 x 62mm
Weight	5200g
Mounting	Panel & VESA

Table 28 Key Features

1 This product has 5 x UART channels in total. The default configuration is 4 x RS232 and 1 x UART for WiFi/BT module. UART can be swapped between RS232 and RS485 modes easily, so if you need different RS232/RS485 configuration, please get in touch with the Chipsee Technical Support at **support@chipsee.com**

Power Input

The PPC-A9-170-C Industrial Panel PC can be powered by a wide range of input voltages: From 15V to 36V DC. The power input connector is a **3-pin, 3.81mm terminal**. The polarity

and the pinout is clearly marked on the housing of the product as shown on the figure below.

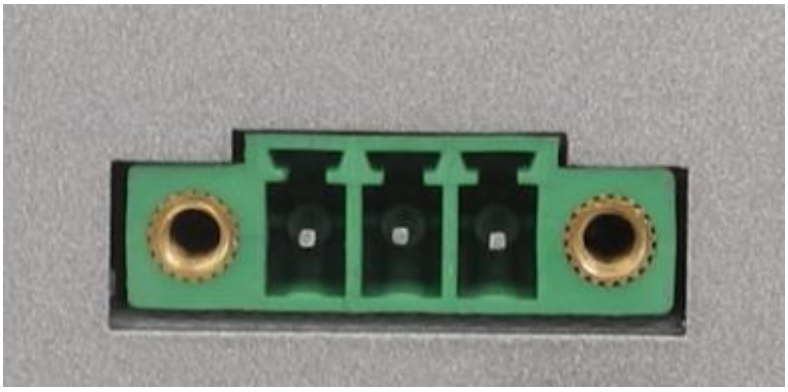

Figure 94: *Power Input*

Note that the "**+**" sign represents the positive power input, and it is printed both at the casing and as a silk-screen on a PCB of the embedded version. The "**-**" terminal is shorted to the ground.

Power Input Definition		
Pin Number	**Definition**	**Description**
Pin 1	Positive Input	DC Power **Positive Terminal**
Pin 2	Negative Input	DC Power **Negative Terminal**
Pin 3	Ground	**Power System Ground**

Table 29 Power Connector

Note

The system ground "**G**" is connected to power negative "**-**" on board.

Touch Screen

The PPC-A9-170-C Industrial Panel PC uses a 10-point capacitive touch screen.

Attention

A capacitive touch screen is susceptible to power noise and Electromagnetic Radiation (EMR). It may cause LCD ripples or even capacitive touch malfunction. If using a capacitive multi-touch test application, you might notice the touch points float erratically across the display. There are several solutions to this problem:

1. Use a high-quality Power Adapter Unit (PSU) with low EMR. You can also provide power from a battery.
2. Make sure that the PPC-A9-170-C Power Input connector (pin 3) is properly connected to the Power System Ground to provide sufficient EMI shielding and eliminate the problem entirely.
3. Bad GND problem can also be confirmed by touching pin 3 of the Power Input connector with one hand while operating the capacitive touch screen with the other hand. In this case, the operator's body acts as the Power System Ground.

Connectivity

There are many connectivity options available on the PPC-A9-170-C industrial PC. It has 4 x USB 2.0 HOST, 1 x USB OTG (can be customized to Host or OTG), 1 x Channel 1000Mbps LAN (RJ45) Ethernet connector supporting up to 1 Gbps, and 4 x DB9 connectors.

DB9 Connectors

The PPC-A9-170-C Industrial Panel PC has 4 x DB9 connectors that are configured as RS232 by default as shown on the figure below. You can configure **COM3/COM4** as RS485. If you need different RS232/RS485 configuration, contact the Chipsee Technical Support at **support@chipsee.com**.

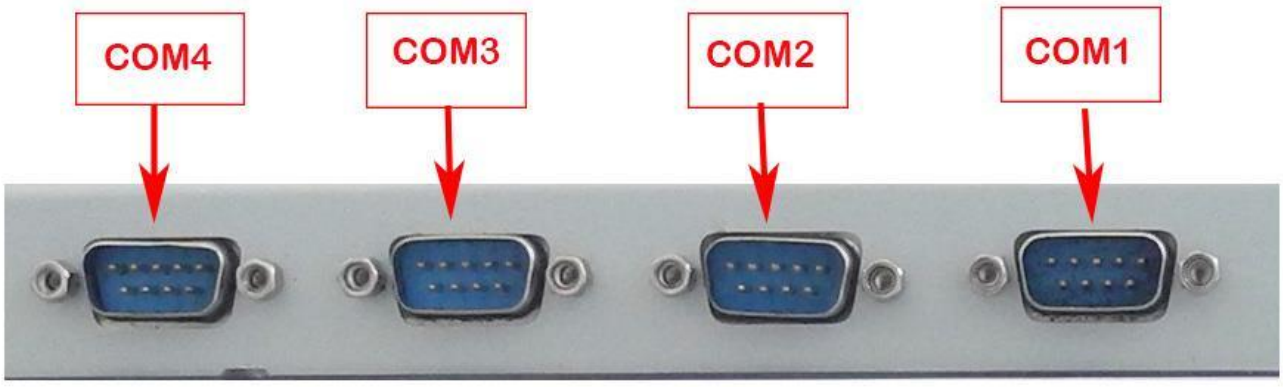

Figure 95: DB9 Connectors

USB Connectors

There are 4 x Type A **USB HOST connectors** onboard, as shown on the figure below.

Figure 96: *USB HOST Connectors*

There is also 1 x Type Mini B **USB OTG connector**, configured as slave by default.

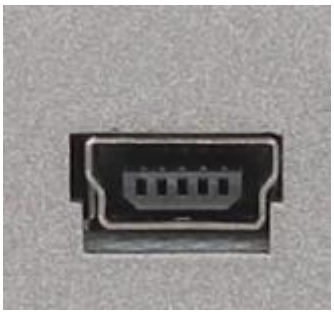

Figure 97: *USB OTG Connector*

LAN Connectors

LAN (RJ45) connector provides Ethernet connectivity over standardized Ethernet cables as shown the figure below. The integrated Ethernet interface supports up to 1 Gbps data throughput.

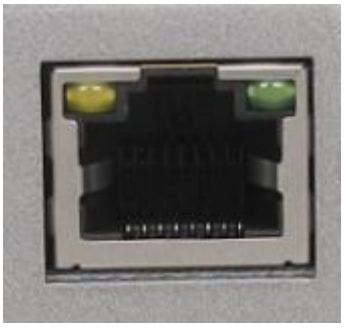

Figure 98: *RJ45 LAN Connector*

Note

Use CAT5 or better cables to achieve full data throughput over maximum distance defined by the 1000BASE-T standard (100m).

WiFi & BT Module

The PPC-A9-170-C Industrial Panel PC is equipped with the popular **Realtek RTL8723 WiFi/ BT module** that supports BT/BLE 4.0 (with backward compatibility), as well as 802.11bgn 2.4 GHz Wireless LAN (WLAN).

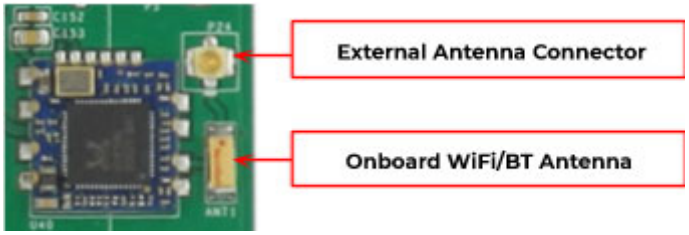

Figure 99: *RTL8273 WiFi/BT Module*

The product includes an SMA connector for an external WiFi/BT antenna, as illustrated in the figure below.

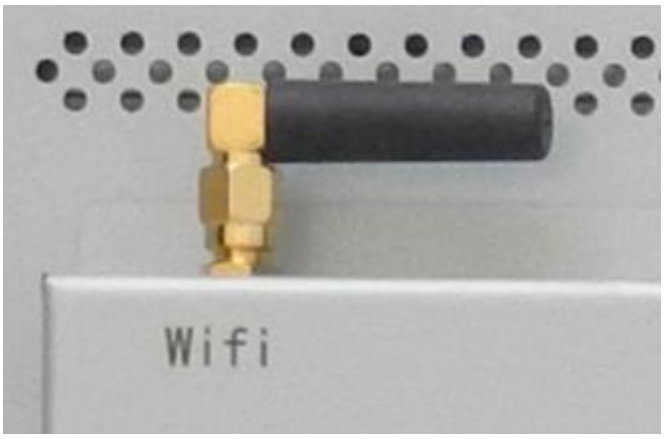

Figure 100: *WiFi+BT Antenna*

4G/LTE Module

The PPC-A9-170-C Industrial Panel PC is equipped with a **mini-PCIe connector** that can connect to a 4G/LTE module. The customer will also need a SIM Card Holder and a 4G/LTE Antenna Connector to ensure 4G/LTE works on the PPC-A9-170-C.

Figure 101: *SIM Card Holder*

Attention

1. The product does not come shipped with the 4G/LTE module by default.
2. Also, there is no software driver for any kind of 4G/LTE module on Chipsee store.

Expansion Port

The PPC-A9-170-C Industrial Panel PC has 1 x **Expansion Port** as shown on the figure below. It is an unpopulated PCB footprint with the standard 2.54mm (1") pitch holes. This connector has connected to isolated GPIO signals.

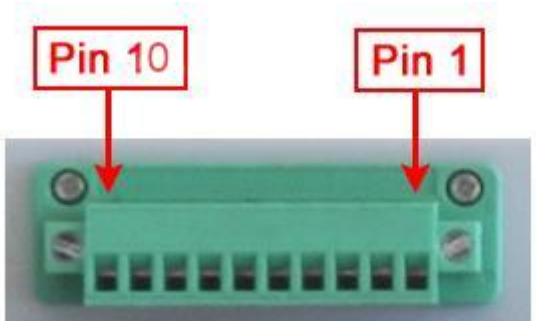

Figure 102: *Expansion Port*

Expansion Connector Pinout			
PIN	**Function**	**PIN**	**Function**
1	VDD, Isolated Power Input (+5V – +24V)	2	GND_ISO
3	OUT1	4	OUT2
5	OUT3	6	OUT4
7	IN1	8	IN2
9	IN3	10	IN4

Table 30 Expansion Connector Pinout

Warning

Since the PCB traces of the port are connected to the processor directly, be careful not to cause electrostatic discharge or over voltage on the pins, as it may damage the processor. Take all the necessary precautions while working with electrostatic-sensitive equipment.

Audio Connectors

The PPC-A9-170-C Industrial Panel PC features some audio peripherals, as well. It has 1 x **3.5mm audio input jack** and 1 x **3.5mm audio output jack**.

The pink connector is the audio input jack (line-in) and the blue connector is the audio output jack (line-out, typically around -10 dBV) as shown on the figure below.

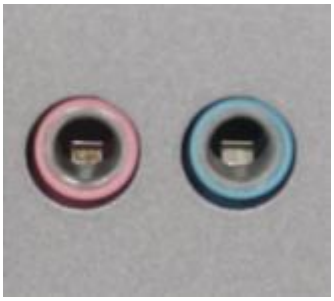

Figure 103: *Audio I/O Connectors*

HDMI Connector

The PPC-A9-170-C Industrial Panel PC is equipped with 1 x **HDMI connector**. The HDMI connector allows connecting an additional (external) monitor. HDMI output resolution can be configured by the software.

Figure 104: *HDMI Connector*

Boot DIP Switch

The PPC-A9-170-C Industrial Panel PC supports boot from SD card. If you want to re-flash the Operating System (OS), you can use the TF card for that purpose, combined with the **DIP switch** settings as illustrated in the figure below.

There is no need to alter the DIP switch settings during regular operation. However, if you need to reinstall the OS, please refer to the table below. Detailed information on how to re-flash the OS can be found in the Software Documentation.

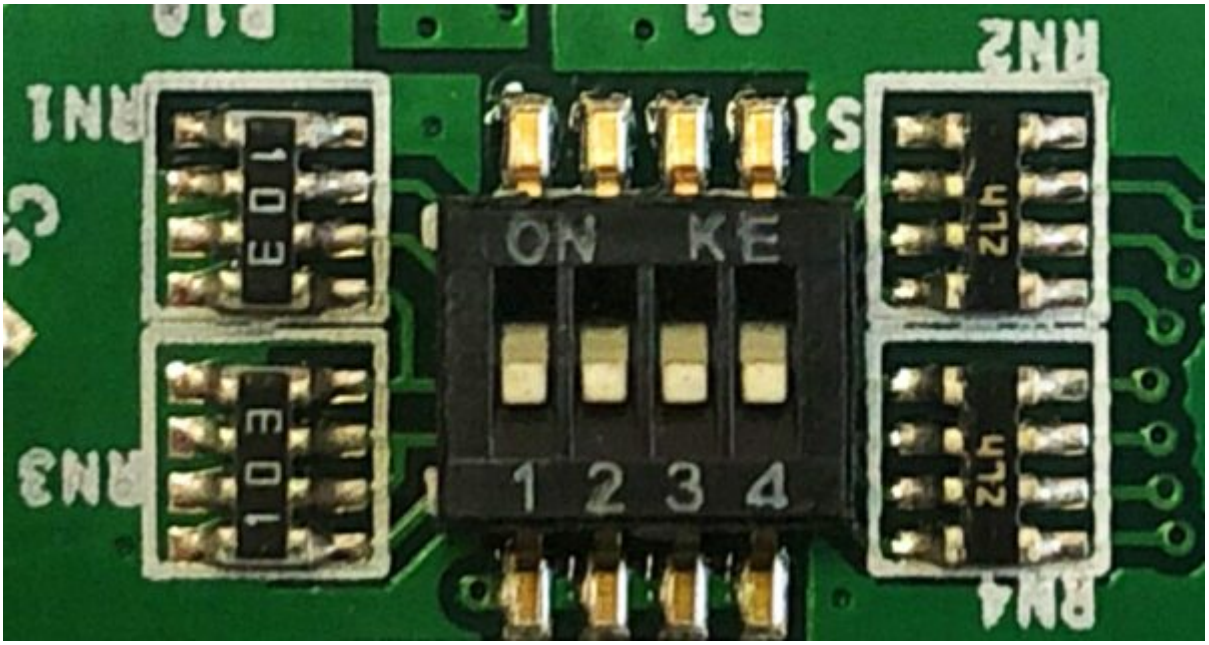

Figure 105: *Boot DIP Switch*

Boot Config Select				
DIP SW	**1**	**2**	**3**	**4**
SD	1	0	0	0
eMMC	1	1	0	1
Download	0	1	1	0

Table 31 Boot Configuration Selection

Measurements and Mounting Procedure

The outer mechanical dimensions of PPC-A9-170-C are 392 x 330 x 62mm (W x L x H).

The PPC-A9-170-C Industrial Panel PC can be mounted with 8 x M4 screws or 4 x M4 screws using the VESA (100x100cm or 75x75cm) and Panel mounting methods, enabling simplified installation onto any standard mounting fixture.

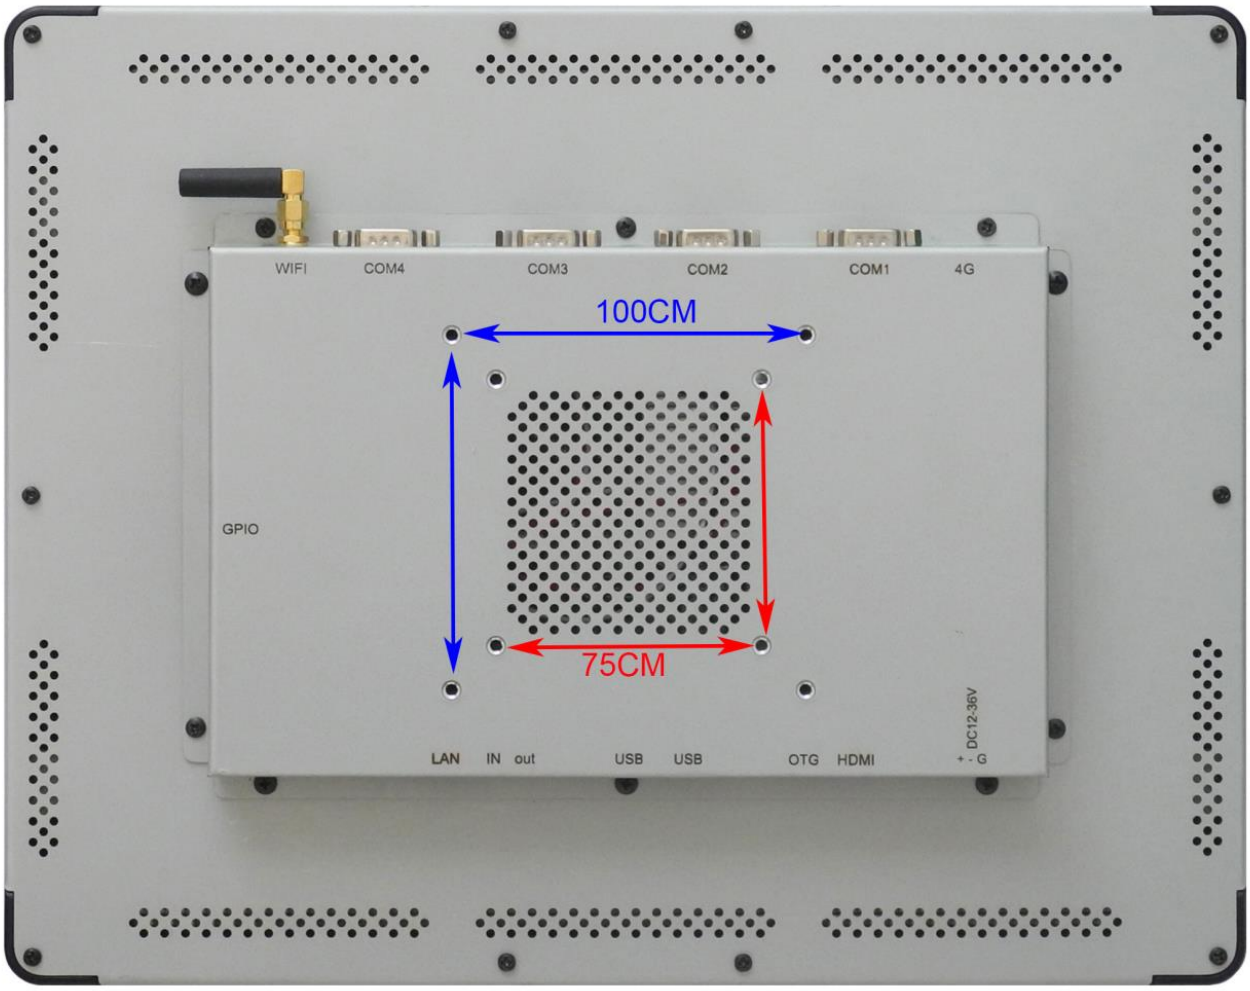

Figure 106: *Mounting Method*

Note

Please make sure the display is not exposed to high pressure when mounting into an enclosure.

You can find detailed information about mounting in the Mount IPC Guide.
