Product Overview

The Cortex[®]-A72+ Cortex[®]-A53 series CS-RK3576-BOX (PN: CS-RK3576-BOX) is a high-quality IP65-compliant industrial box PC.

Key Applications

- Process Control
- Process Monitoring
- IIoT node
- Environmental Monitoring
- PLC
- Automotive applications
- ATM...

The CS-RK3576-BOX Industrial Box PC is based around the powerful RK3576 System on Chip (SoC), powered by the Rockchip RK3576 low-power processor which integrates a Quad-core Cortex-A72(1.6GHz) + Quad-core Cortex-A53(1.4GHz) processor, and a 6 TOPS(Sparsity)@INT8 computing power NPU (neural processing unit).

The RK3576 supports multi-format video decoders and has a high-performance 4GB LPDDR5 RAM capable of sustaining demanding memory bandwidth. It also provides a complete set of peripheral interfaces.

Ordering Options

Chipsee products can be customized during the ordering process. The product will be shipped with the pre-installed factory defaults if no extra requirements are specified. The table in the [Hardware Features](#) section provides information about the default options bundled with the product.

Note

You can order the [CS-RK3576-BOX](#) from the official [Chipsee Store](#) or from your nearest distributor.

Operating System

This product comes with a pre-installed OS of your choice. Please see the list below for the supported OSes, which can also be obtained from the [Software Documentation](#) section, along with the detailed installation instructions.

- Android 14
- Debian 12
- Buildroot Linux Qt 5.15

Warning

The [Software Documentation](#) section provides a detailed instruction on how to install different OSes on your own. However, bear in mind that Chipsee can't take the responsibility of inadequate installation procedure. If you "brick" your device, please contact Chipsee Technical Support at support@chipsee.com for further assistance

Optional Features

The CS-RK3576-BOX Industrial Box PC does not include 4G/LTE module by default. The module is optional and can be selected at the Chipsee store during the ordering process.

The CS-RK3576-BOX Industrial Box PC does not include M.2 NVMe SSD module by default. The module is optional and can be selected at the Chipsee store during the ordering process.

The CS-RK3576-BOX Industrial Box PC does not support PoE.

Warning

Installation, repair, and maintenance tasks should be performed by trained personnel only. Chipsee does not bear any responsibility for damage caused by inadequate handling of the product.

Hardware Features

The CS-RK3576-BOX Industrial Box PC offers a broad range of performance and connectivity options for scalable integration, providing expandability according to future needs. Some of the key features are listed in the table below.

| CS-RK3576-BOX | |
|---------------|---|
| CPU | Rockchip RK3576J, Quad-core Cortex-A72 (1.6GHz) + Quad-core Cortex-A53 (1.4GHz) |
| RAM | 4GB LPDDR5 |
| NPU | 6 TOPS(Sparsity)@INT8 |
| eMMC | 64GB |
| Storage | TF Card, Supports up to 128GB SDHC |
| PCIe | Optional, supports M.2 M-Key 2230/2240 (PCI-E 3.0 x1) module (4G/LTE Mini PCIe cannot be used with M.2 PCIe at the same time) |
| Display | N/A |
| Touch | N/A |
| HDMI | 1 x HDMI-D (Micro-HDMI) Out |
| USB | 1 x USB 2.0 HOST, 1 x USB 3.0 HOST, 1 x USB Type-C (USB3.0 port and USB-C port cannot be used at the same time) |
| LAN | 2 x RJ45, GbE |
| POE | N/A |
| Audio | 3.5mm Audio In/Out Connector, 2W Internal Speaker |
| Buzzer | Yes |
| RTC | High accuracy RTC with farad capacitor, can work 1 week after power off (default) . High accuracy RTC with lithium coin battery, can work 3 years after power off <i>(optional)</i> . |
| RS232 | Default to 2 x RS232 (including 1 debug port). Up to 6 x RS232 by swapping 3 x RS485 + CAN1 to 4 x RS232. ¹ |
| RS485 | Default to 3 x RS485. Optionally, these 3 x RS485 can be configured to RS232. ¹ |
| CAN | Default to 2 x CAN FD. Optionally, 1 x CAN(CAN1) can be configured to RS232. |
| GPIO | 8 Channels Isolated IO, 4 x Input and 4 x Output |
| WiFi/BT | Integrated WiFi/Bluetooth Module |
| 4G/LTE | Supported, Optional (4G/LTE Mini PCIe cannot be used with M.2 PCIe at the same time) |
| Power Input | From 9V to 30V (supports optional 24V ignition signal) |
| Current | 400mA (max) at 15V |

| CS-RK3576-BOX | |
|---------------------|---|
| Power Consumption | 6W (max) |
| Working Temperature | From -40°C to +85°C |
| OS | Android 14, Debian12, Buildroot Linux Qt 5.15 |
| Dimensions | CS-RK3576-BOX (PN: CS-RK3576-BOX): 209 x 125 x 37.3mm |
| Weight | CS-RK3576-BOX (PN: CS-RK3576-BOX): 900g |
| Mounting | CS-RK3576-BOX (PN: CS-RK3576-BOX): Rear, VESA |

Key Features

1(1,2)This product has 5 x UART by default, 6 x UART channels at most. The default configuration is 2 x RS232 and 3 x RS485, including 1 RS232 debug port. The 3 x RS485 + CAN1 can be configured to 4 x RS232. UART can be swapped between RS232 and RS485 modes easily, if you need a different RS232/RS485 configuration, please get in touch with the Chipsee Technical Support at support@chipsee.com

Power Input

The CS-RK3576-BOX Industrial Box PC can be powered by a wide range of input voltages: From 9V to 30V (supports optional 24V ignition signal) DC.

There are two DC input interfaces on this device: a **3-pin, 3.81mm screw terminal** connector, and a **2.1mm DC input head**. As shown in the figure below.

Power Input

Note that the “+” sign represents the positive power input. The “-” terminal is shorted to the ground.

| Power Input Definition | | |
|------------------------|----------------|-----------------------------------|
| Pin Number | Definition | Description |
| Pin 1 | Positive Input | DC Power Positive Terminal |
| Pin 2 | Negative Input | DC Power Negative Terminal |
| Pin 3 | Ground | Power System Ground |

Power Connector

 **Note**

The system ground “G” is connected to power negative “-” on board.

For a proper 2.1mm x 5.5mm x 9.5mm DC power connector, refer to the figure below:

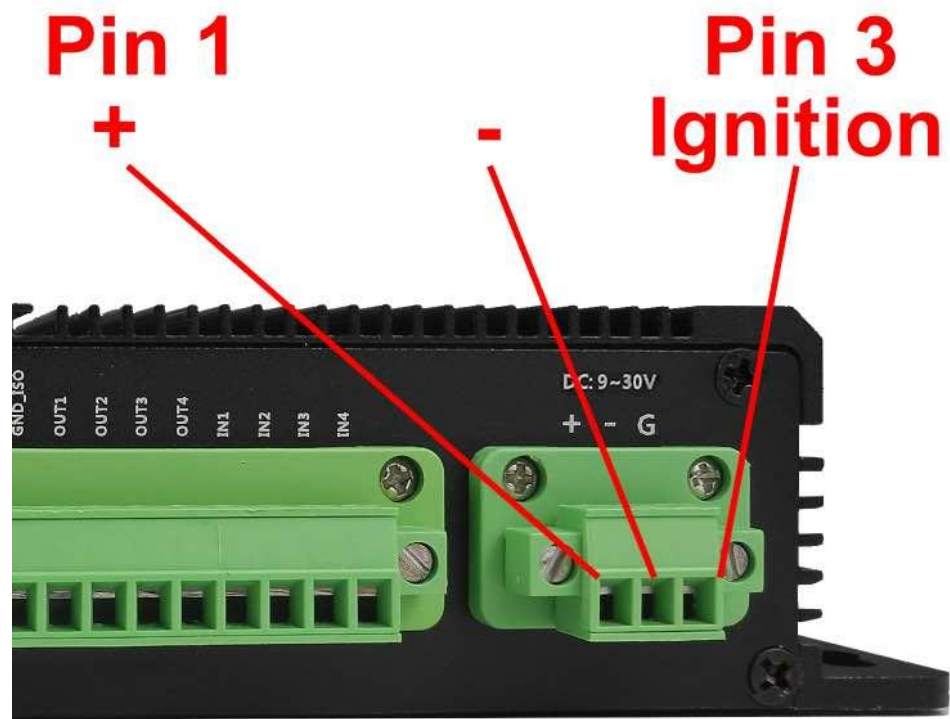

Ignition Signal

The product has a “ignition signal” **optional** feature. By default the ignition signal is not installed. If you need this feature you can contact us when placing an order. In this setup, Pin 3 is the ignition signal pin.

The DC jack doesn’t support ignition signal.

To use this feature, apply a 24V DC input (relative to -) to Pin 3. If Pin 3 detects a low input voltage, the product will be shutdown. If Pin 3 detects a high input voltage, the product will be boot and running.

Power Input (with Ignition Signal)

| Power Input Definition | | |
|------------------------|----------------|-----------------------------------|
| Pin Number | Definition | Description |
| Pin 1 | Positive Input | DC Power Positive Terminal |
| Pin 2 | Negative Input | DC Power Negative Terminal |
| Pin 3 | Ignition | Ignition Signal |

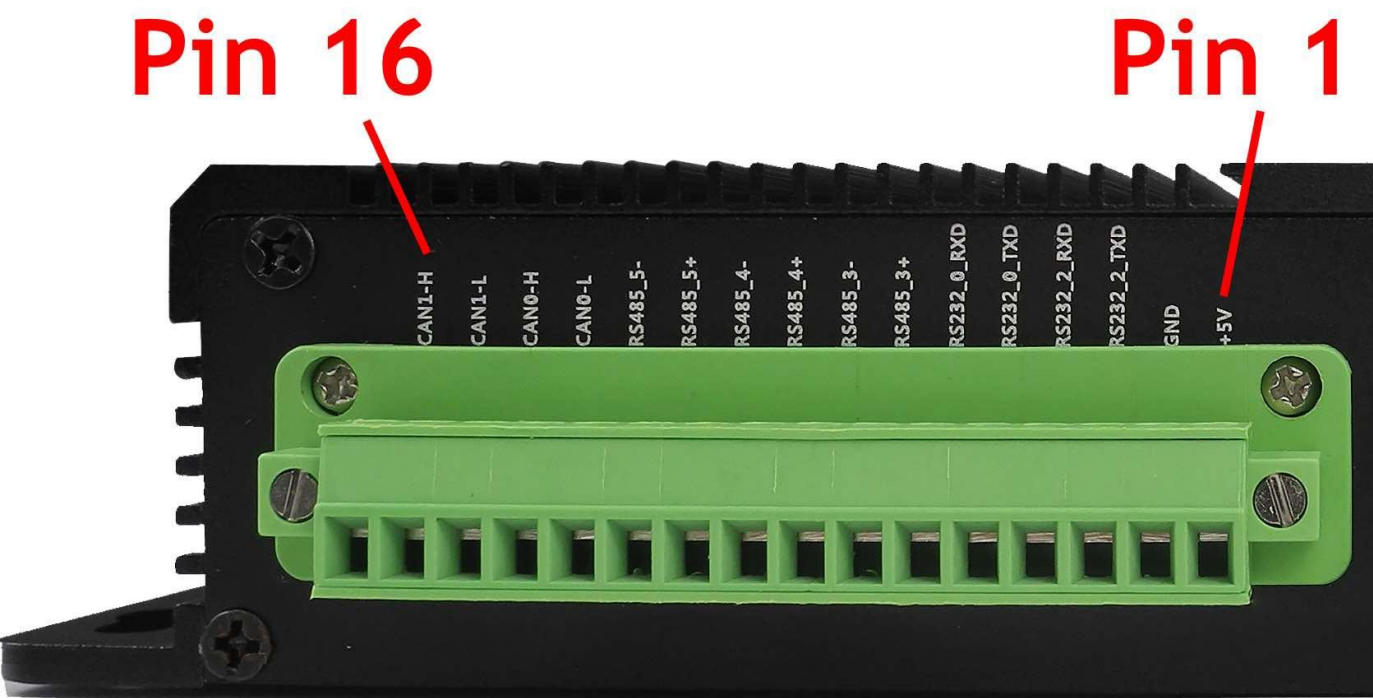

Power Connector with Ignition Signal

Connectivity

There are many connectivity options available on the CS-RK3576-BOX industrial PC. It has 1 x USB 2.0 HOST, 1 x USB 3.0 HOST, 1 x USB Type-C, 2 x network connectors (RJ45) supporting up to 1 Gbps, 2 x CAN FD and 5 x UART terminals (RS232/485).

RS232+RS485+CAN

The serial communication interfaces (RS485, RS232, and CAN FD) are routed to a **16-pin 3.81mm terminal**, as illustrated in the figure below. Serial communication on both RS485 and RS232 interfaces can reach up to 115200 kbps.

 **Attention**

- The 120Ω match resistor for **CAN** bus is **NOT mounted** by default.
- The 120Ω match resistor for **RS485** is **already mounted** by default.
- This product supports changing 3 x RS485 to 3 x RS232, supports changing 1 x CAN(CAN1) to 1 x RS232, providing up to 6 x RS232 (including one debug port).

The table below offers a detailed description of every pin:

| RS232 / RS485 / CAN Pin Definition: | | | |
|-------------------------------------|------------|---------------------------------|---------|
| Pin Number | Definition | Description | OS Node |
| Pin 16 | CAN1_H | CPU CAN1_M3, CAN BUS "H" signal | CAN1 |

| RS232 / RS485 / CAN Pin Definition: | | | |
|-------------------------------------|-------------|---|-----------------|
| Pin 15 | CAN1_L | CPU CAN1_M3, CAN BUS "L" signal | |
| Pin 14 | CAN0_H | CPU CAN0_M2, CAN BUS "H" signal | CAN0 |
| Pin 13 | CAN0_L | CPU CAN0_M2, CAN BUS "L" signal | |
| Pin 12 | RS485_5- | CPU UART7, RS485 -(B) signal | /dev/ttyS7 |
| Pin 11 | RS485_5+ | CPU UART7, RS485 +(A) signal | |
| Pin 10 | RS485_4- | CPU UART5, RS485 -(B) signal | /dev/ttyS5 |
| Pin 9 | RS485_4+ | CPU UART5, RS485 +(A) signal | |
| Pin 8 | RS485_3- | CPU UART3, RS485 -(B) signal | /dev/ttyS3 |
| Pin 7 | RS485_3+ | CPU UART3, RS485 +(A) signal | |
| Pin 6 | RS232_0_RXD | CPU UART2, RS232 RXD signal | /dev/ttyS2 |
| Pin 5 | RS232_0_TXD | CPU UART2, RS232 TXD signal | |
| Pin 4 | RS232_2_RXD | CPU UART0, RS232 RXD signal, Debug Port | /dev/ ttyFIQ |
| Pin 3 | RS232_2_TXD | CPU UART0, RS232 TXD signal, Debug Port | |
| Pin 2 | GND | System Ground | |
| Pin 1 | +5V | System +5V Power Output, No more than 1A Current output | |

RS232 / RS485 / CAN Pin Definition for 7 inch/Box products

GPIO

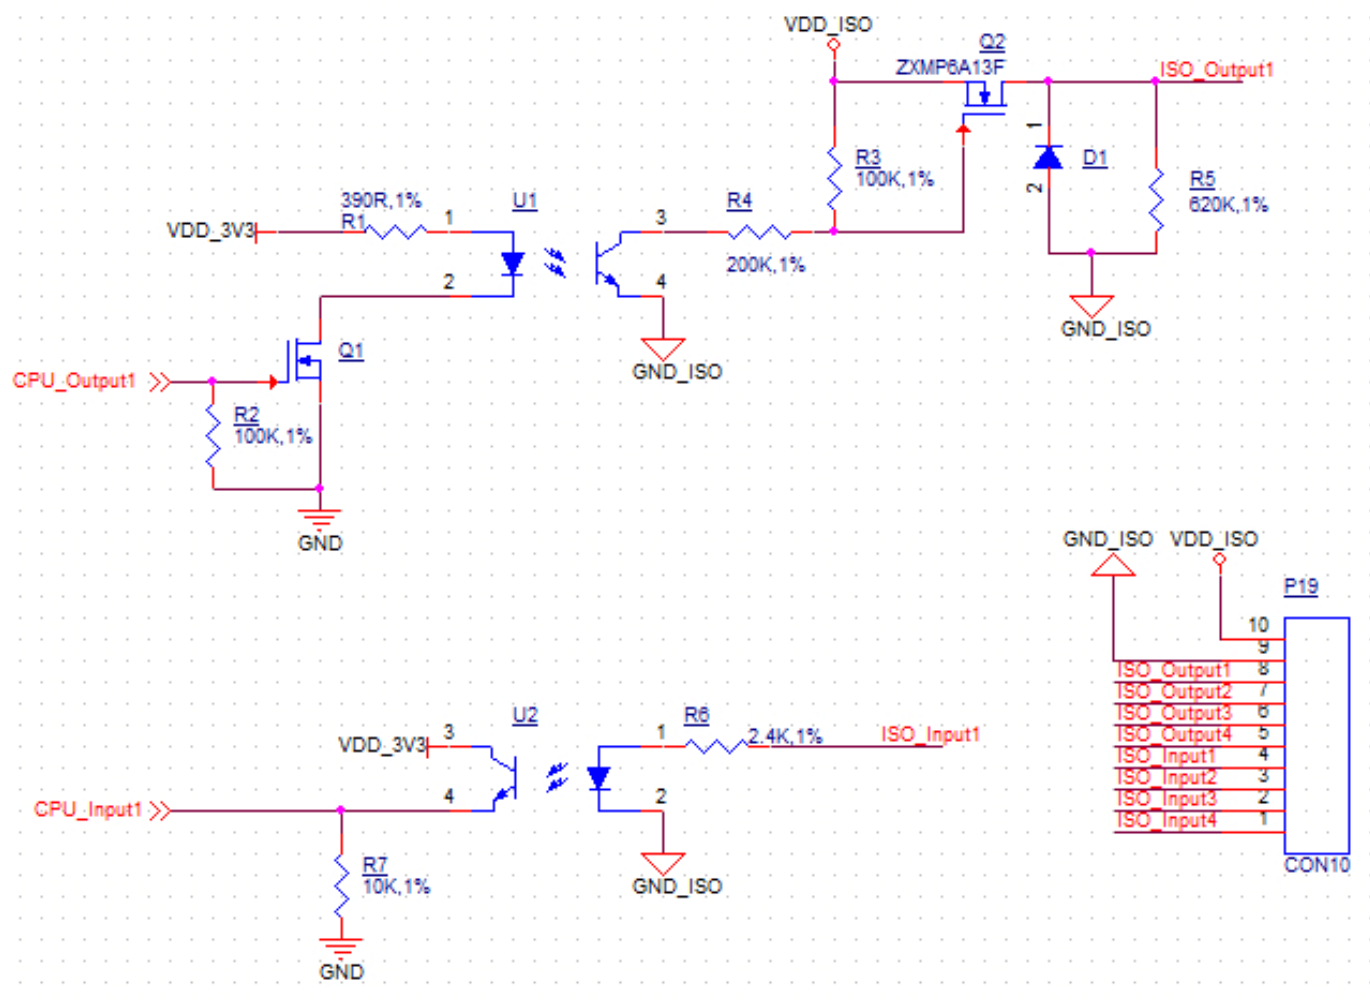

The CS-RK3576-BOX Industrial Box PC features a 10 Pin 3.81mm connector that provides 8 x opto-isolated GPIO pins, of which 4 x are output, and 4 x are input pins.

The GPIO **HIGH** output level corresponds to the voltage connected at the isolated Power Input, while the GPIO **LOW** output level corresponds to the isolated Ground Input.

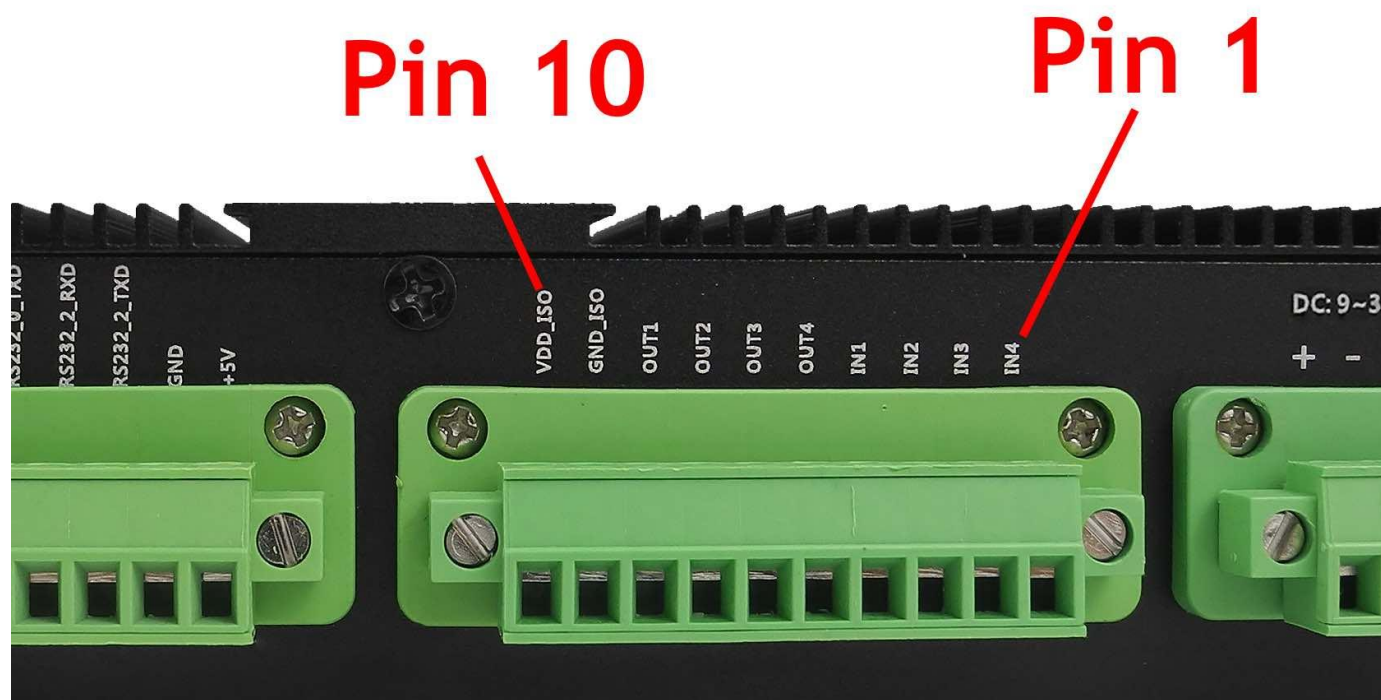

The GPIO uses the 24V logic by default. You can use an external isolated power input but the power input range should be from 5V to 24V DC.

Attention

1. In order to use the Isolated Output, you need to add an external Isolated Power to the VDD_ISO and GND_ISO. The power voltage should not exceed 24V.
2. The output current can supply 500mA for every channel, but it also depends on the isolated power that is connected.
3. In order to use the Isolated Input, you need to add a signal to the InputX and GND_ISO. A 2.4K Ω resistor has been added to limit the input current, as shown in the figure below. This resistor should work well for the 5-24V input signal. If your input signal is less than 5V, please change this input resistor. The reduced schematic is for reference purpose, if you need the precise resistor schematic, please contact us.
4. If the isolation is not a requirement, it is possible to use a non-isolated PSU instead. It is also possible to use the onboard 5V power supply: it can be re-routed to the *Isolated Power Input* pin by populating two PCB resistor footprints with 0 Ω resistors. In this case, the *Isolated Power Input* pin will become an output for the onboard 5V power supply.

Isolated GPIO reduced schematic

GPIO Terminal

| Pin Number | Definition | GPIO Chip | GPIO Line | SYSFS |
|------------|------------|-----------|-----------|-------|
| Pin 1 | IN4 | 3 | 15 | 111 |
| Pin 2 | IN3 | 3 | 16 | 112 |
| Pin 3 | IN2 | 3 | 21 | 117 |
| Pin 4 | IN1 | 3 | 22 | 128 |
| Pin 5 | OUT4 | 0 | 2 | 2 |
| Pin 6 | OUT3 | 3 | 28 | 124 |
| Pin 7 | OUT2 | 2 | 6 | 70 |
| Pin 8 | OUT1 | 2 | 7 | 71 |
| Pin 9 | GND_ISO | | | |
| Pin 10 | VDD_24V | | | |

GPIO Connector Pin-out

USB Connectors

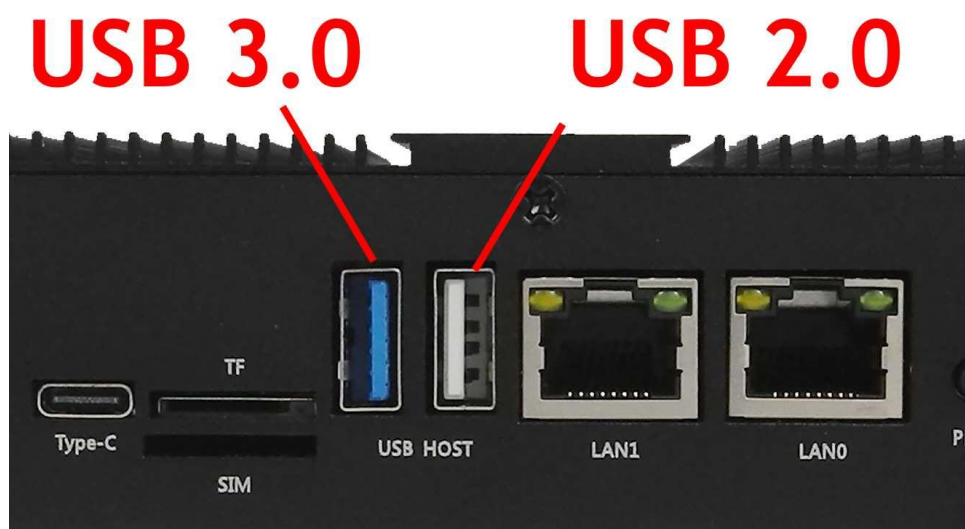

There are 2 x **USB HOST** and 1 x **USB DEVICE** (for flashing OS) ports onboard: 1 x USB 2.0 HOST, 1 x USB 3.0 HOST, 1 x USB Type-C, as shown in the figures below.

Warning

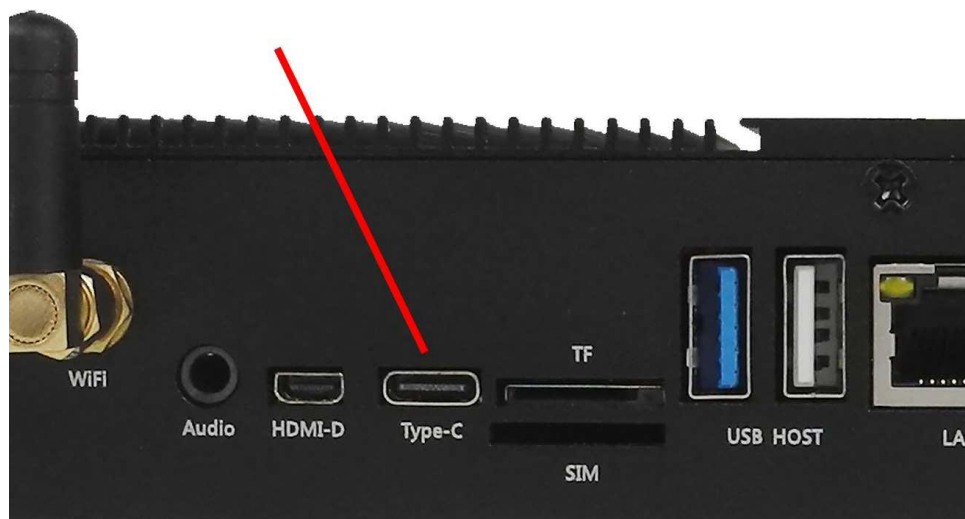

Please unplug **USB mouse/keyboard** from the USB3.0 port when flashing OS.

The USB3.0 type-A host and USB-C **can't be used** at the same time. Before boot into OS, USB-C is enabled for installing OS image; after boot into OS, USB-A is enabled but USB-C is disabled.

In Android, these can be configured, USB3.0 type A is enabled by default, but you can switch to using USB-C in the software for debugging; in Linux, these can't be configured.

USB HOST Ports

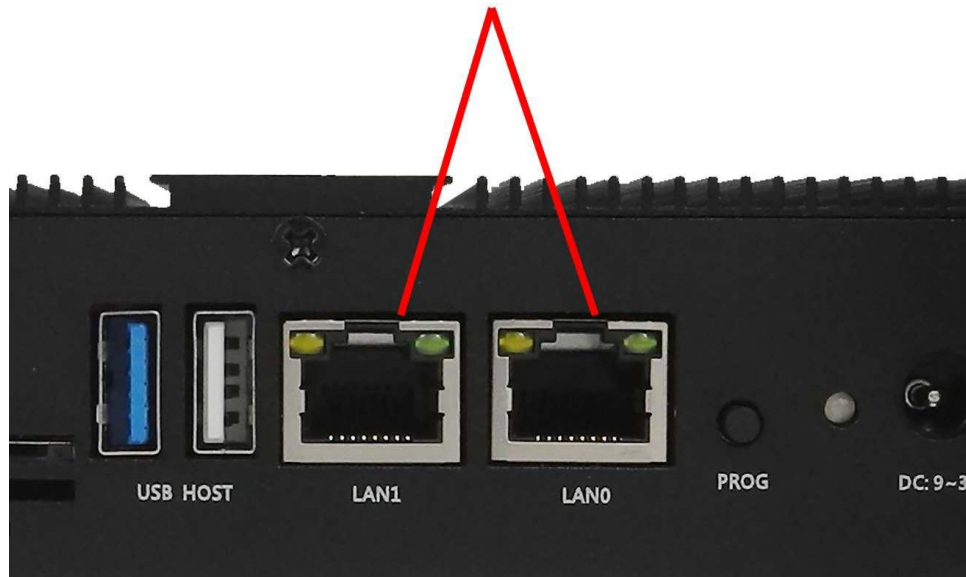

USB Type-C Port

LAN Connector

LAN (RJ45) connector provides 2 x RJ45 Ethernet connectivity over standardized Ethernet cables as shown in the figure below. The integrated Ethernet interface supports up to 1 Gbps data throughput.

This product does not support PoE(Power over Ethernet).

RJ45 LAN Connector

Note

Use CAT5 or better cables to achieve full data throughput over maximum distance defined by the 1000BASE-T standard (100m).

WiFi & BlueTooth Module

The CS-RK3576-BOX Industrial Box PC is equipped with the popular **Realtek RTL8821CS WiFi/BT module** which supports BT/BLE 2.1/3.0/4.2, as well as 802.11ac/abgn 433Mbps 2.4/5.8 GHz Wireless LAN (WLAN).

RTL8821CS WiFi/BT Module

The CS-RK3576-BOX includes an SMA connector for an external WiFi/BT antenna, as illustrated in the figure below.

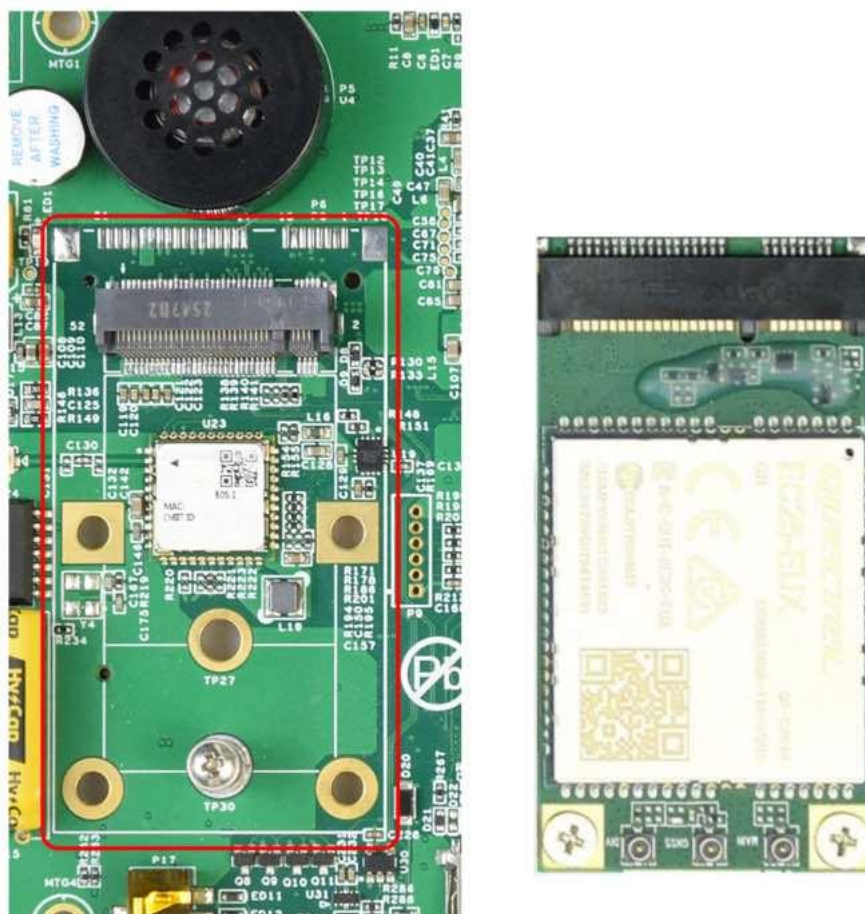

WiFi+BT Antenna SMA

4G/LTE Module

The CS-RK3576-BOX Industrial Box PC is equipped with a mini-PCIe connector that can connect an optional 4G/LTE module. The customer will also need a SIM Card Holder and a 4G/LTE antenna connector to ensure 4G/LTE works.

SIM card does **NOT** support hot plug. **Power off** before inserting or removing SIM card.

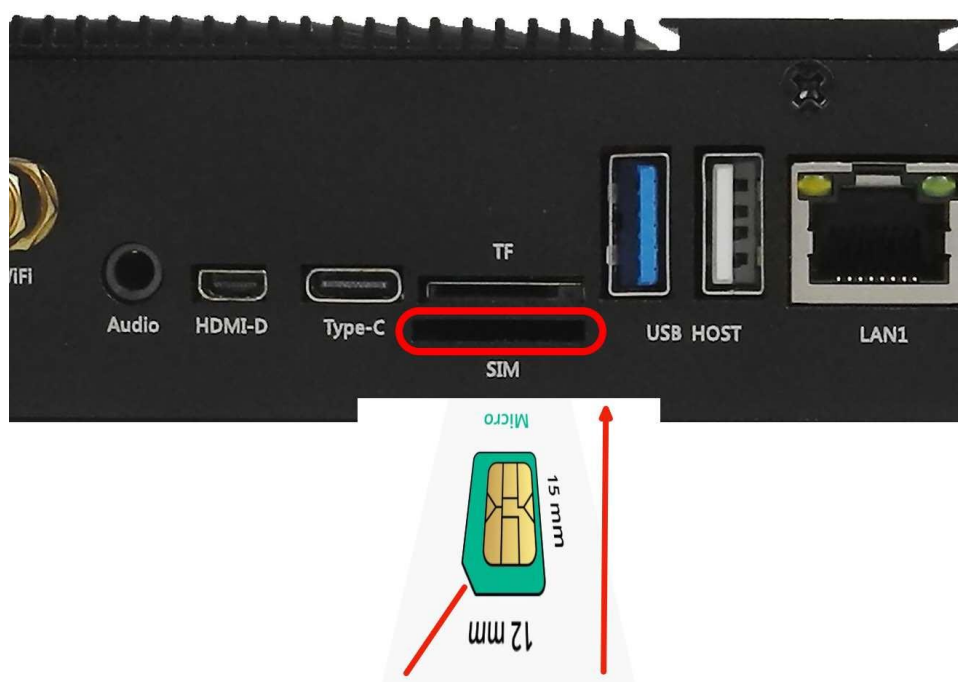

4G/LTE Mini PCIe cannot be used with M.2 PCIe at the same time

mini-PCIe Connector & 4G Module

4G/LTE Antenna

SIM Card Direction

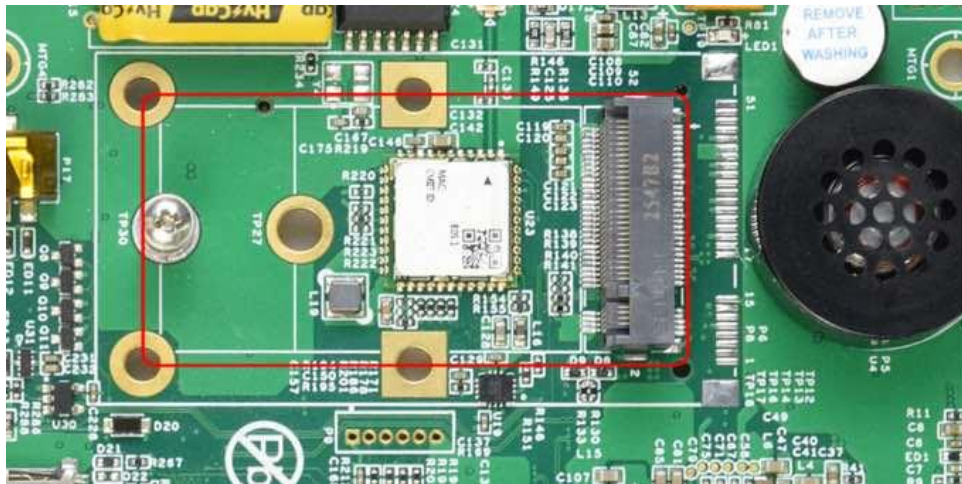

Attention

The product does not come shipped with the 4G/LTE module by default. The customer can choose the 4G/LTE module option when placing an order, we will install all the necessary components.

M.2 Slot

There is an **optional** M.2 slot on the CS-RK3576-BOX that allows an optional SSD. The M.2 slot is capable of holding a M.2 M-Key 2230/2240 (PCI-E 3.0 x1) module. **4G/LTE Mini PCIe cannot be used with M.2 PCIe at the same time.**

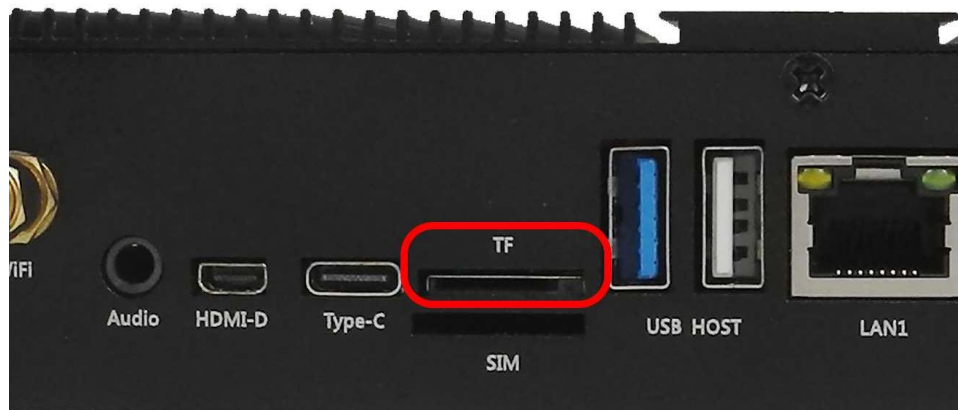

The CS-RK3576-BOX does not come shipped with an SSD nor an M.2 slot by default. If you need the M.2 slot or M.2 devices please contact us before placing an order.

M.2 Slot (PCIe 3.0 x1)

TF Card Slot

The CS-RK3576-BOX Industrial Box PC features 1 x **TF Card (micro SD) slot**. TF Card can address up to 128GB of storage.

TF (micro SD) Card Slot

Note

The product does not come shipped with the TF Card by default.

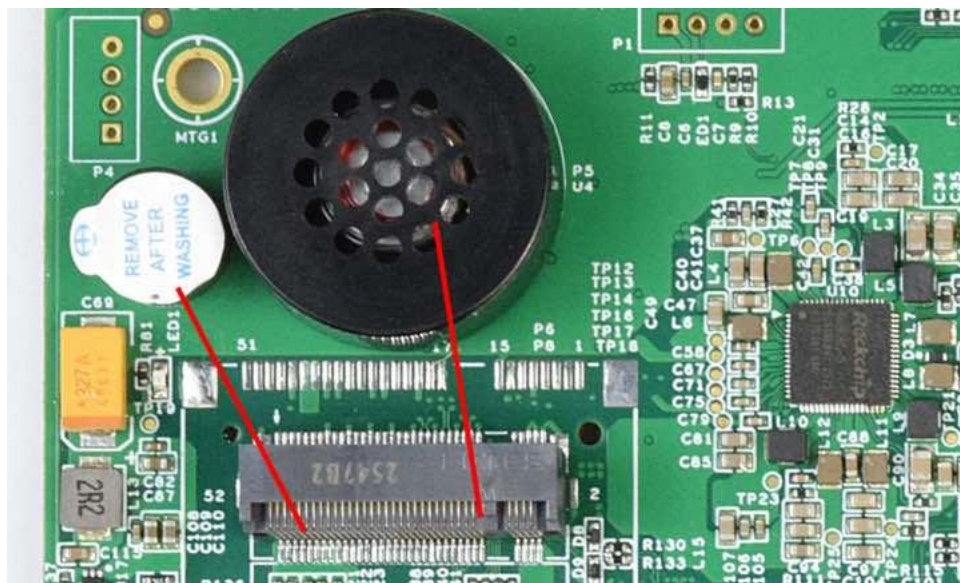

Audio Connectors

The CS-RK3576-BOX Industrial Box PC features some audio peripherals. It has a **3.5mm audio input/output jack**, an **internal speaker**, as well as a small **buzzer**.

Audio Jack

The miniature 2W embedded speaker is handy for audio reproduction, the small buzzer can play alarm/notification sounds.

2W Micro Speaker and Buzzer

⚠ Attention

By plugging in the headphone cable, the internal speaker will be disabled automatically.

HDMI Connector

The CS-RK3576-BOX Industrial Box PC is equipped with 1 x HDMI-D (Micro-HDMI) Out port. The HDMI connector allows connecting an additional (external) monitor. HDMI output resolution can be configured by the software.

HDMI Connector

PROG Button

The CS-RK3576-BOX Industrial Box PC has one button on the board marked as PROG, as shown in the figure below.

When the button is pressed before powering up, the CS-RK3576-BOX will enter LOADER mode. In this mode you can use a USB Type-C cable to upgrade its operating system. You can use this feature to flash another OS to the internal eMMC.

When the button is not pressed before and during power up, the CS-RK3576-BOX will boot normally.

There is no need to press the button during regular operation. However, if you need to flash the OS in MASKROM mode, the button will be used. Please refer to the [software documents](#) for more information.

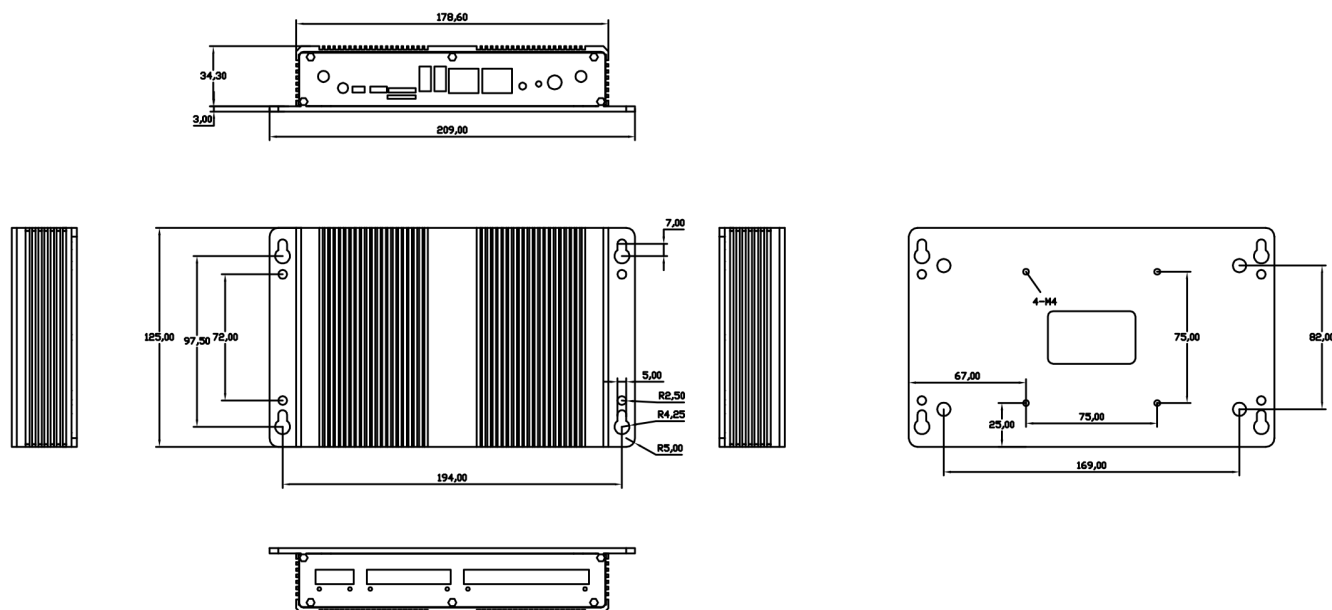

PROG Button

Mounting Procedure

You can mount CS-RK3576-BOX with VESA mounting ([guide](#)): **75 x 75** mm, 4 x **M4** (6mm) screws.

You can also mount CS-RK3576-BOX with rear mounting method ([guide](#)).

For CS-RK3576-BOX, the outer mechanical dimensions are 209 x 125 x 37.3mm (W x L x H).

CS-RK3576-BOX *Technical Drawing*
