# PPC-A76-101

## Front View

## Rear View

## Side View 1

## Side View 2

## Product Overview

The Cortex®-A76 series PPC-A76-101 (PN: CS12800-RK3588-101P) is a high-quality IP65-compliant industrial panel PC. This single board computer features a 10.1" 10-point capacitive touch screen with a resolution of 1280 x 800 pixels and brightness of 400 cd/m<sup>2</sup>.

### Key Applications

- Human Machine Interface HMI
- Mobile Applications
- Video Processing
- Machine Learning
- Video Gaming
- Process Control
- Process Monitoring
- ATM...

It is available as a device housed in an aluminum casing with bezels, thus facilitating different installation options:

- Installation on an industrial cabinet
- Integration with the existing equipment

The PPC-A76-101 Industrial Panel PC is based around the powerful RK3588J System on Chip (SoC), powered by the Rockchip RK3588J low-power processor which integrates a Quad(4)-core Cortex®-A76 (2.0GHz) and Quad(4)-core Cortex®-A55 (1.8GHz) processor.

The RK3588J supports multi-format video decoders and has a high-performance 8GB LPDDR4 RAM capable of sustaining demanding memory bandwidths. It also provides a complete set of peripheral interfaces.

# Ordering Options

Chipsee products can be customized during the ordering process. The product will be shipped with the pre-installed factory defaults if no extra requirements are specified. The table in the [Hardware Features](#) section provides information about the default options bundled with the product.

## Note

You can order the [PPC-A76-101](#) from the official [Chipsee Store](#) or from your nearest distributor.

## Operating System

This product comes with a pre-installed OS of your choice. Please see the list below for the supported OSes, which can also be obtained from the [Software Documentation](#) section, along with the detailed installation instructions.

- Debian 11
- Buildroot Linux Qt 5.15

## Warning

The [Software Documentation](#) section provides a detailed instruction on how to install different OSes on your own. However, bear in mind that Chipsee can't take the responsibility of inadequate installation procedure. If you "brick" your device, please contact Chipsee Technical Support at [support@chipsee.com](mailto:support@chipsee.com) for further assistance

## Optional Features

The PPC-A76-101 Industrial Panel PC does not include 4G/LTE module by default. The module is optional and can be selected at the Chipsee store during the ordering process.

The product has 1 x PCIe3.0 x4, M.2 M-Key 2230/2242/2260/2280 socket (**optional**), you can use it with a NVMe SSD or other modules such as a AI compute module that can fit in the slot and supports the protocol. By default, SSD or AI module is **not included**; by default M.2 slot is **not mounted**. Please **contact us** before placing an order if you need M.2 slot or M.2 devices.

### Warning

Installation, repair, and maintenance tasks should be performed by trained personnel only. Chipsee does not bear any responsibility for damage caused by inadequate handling of the product.

# Hardware Features

The PPC-A76-101 Industrial Panel PC offers a broad range of performance and connectivity options for scalable integration, providing expandability according to future needs. Some of the key features are listed in the table below.

PPC-A76-101	
<b>CPU</b>	Rockchip RK3588J, Quad(4)-core Cortex-A76 (2.0GHz) and Quad(4)-core Cortex-A55 (1.8GHz)
<b>GPU</b>	ARM Mali-G610 MC4. Up to 8K60 FPS video decoding, up to 8K30 FPS video encoding.
<b>NPU</b>	Neural network acceleration engine with 6Tops int8, support Int4/8/16/FP16/BF16/TF32.
<b>RAM</b>	8GB LPDDR4
<b>eMMC</b>	64GB
<b>PCIe</b>	1 x PCIe3.0 x4, M.2 M-Key 2230/2242/2260/2280 socket ( <b>optional</b> )
<b>Storage</b>	TF Card, Supports up to 128GB SDHC
<b>Display</b>	10.1" LCD, 1280 x 800, High Brightness: 400 cd/m <sup>2</sup>
<b>HDMI</b>	1 x HDMI 2.0 Out
<b>Touch</b>	10-point capacitive touch screen
<b>USB</b>	2 x USB 3.0 HOST, 1 x USB Type-C <sup>1</sup>
<b>LAN</b>	1 x RJ45, GbE
<b>POE</b>	N/A
<b>Audio</b>	3.5mm Audio In/Out Connector, 2W Internal Speaker
<b>Buzzer</b>	Yes
<b>RTC</b>	High accuracy RTC with farad capacitor, can work 1 week after power off ( <b>default</b> ). High accuracy RTC with lithium coin battery, can work 3 years after power off ( <i>optional</i> ).
<b>RS232</b>	default 2 x RS232 (Optional 6 x RS232 at most, including 1 debug port) <sup>2</sup>
<b>RS485</b>	default 2 x RS485 at most <sup>2</sup>
<b>CAN</b>	default 2 x CAN FD
<b>GPIO</b>	8 Channels Isolated IO, 4 x Input and 4 x Output
<b>WiFi/BT</b>	Integrated WiFi/BT Module
<b>4G/LTE</b>	Supported, Optional
<b>Power Input</b>	From 15V to 30V (supports <b>optional</b> 24V ignition signal)
<b>Current</b>	700mA max at 15V, 400mA typical at 15V

PPC-A76-101	
<b>Power Consumption</b>	10.5W max, 6W typical
<b>Working Temperature</b>	From -20°C to +70°C
<b>OS</b>	Debian11, Buildroot Linux Qt 5.15
<b>Dimensions</b>	PPC-A76-101 (PN: CS12800-RK3588-101P): 275.5 x 193.5 x 46.0mm
<b>Weight</b>	PPC-A76-101 (PN: CS12800-RK3588-101P): 1300g
<b>Mounting</b>	PPC-A76-101 (PN: CS12800-RK3588-101P): Panel, VESA

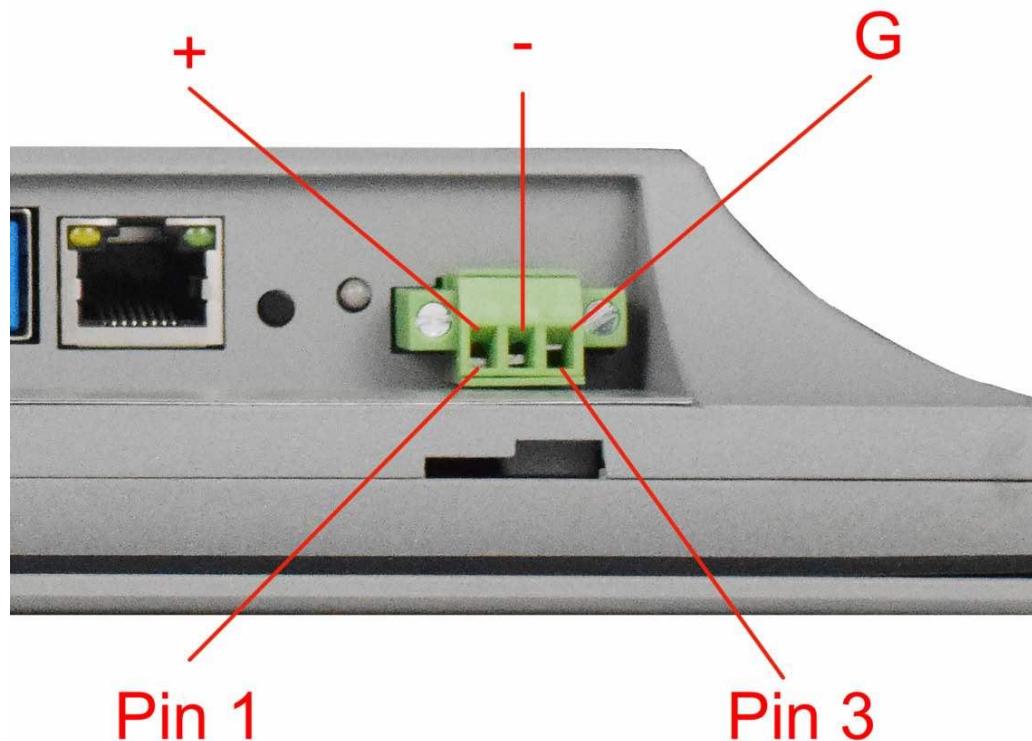

## Key Features

- 1** The USB-A host (near HDMI port) and USB-C **can't be used** at the same time. Before boot into OS, USB-C is enabled for install OS image; after boot into OS, USB-A is enabled but USB-C is disabled. In Android, these can be configured; in Linux, these can't be configured.
- 2(1,2)**This product has 6 x UART channels in total. The default configuration is 2 x RS232 and 2 x RS485, including 1 debug port. CAN0 and CAN1 can be configured to RS232. UART can be swapped between RS232 and RS485 modes easily, if you need a different RS232/RS485 configuration, please get in touch with the Chipsee Technical Support at [support@chipsee.com](mailto:support@chipsee.com)

## Power Input

The PPC-A76-101 Industrial Panel PC can be powered by a wide range of input voltages:  
From 15V to 30V (supports **optional** 24V ignition signal) DC.

There is a **3-pin, 3.81mm terminal** on the board.

*Power Input*

Note that the “+” sign represents the positive power input. The “-” terminal is shorted to the ground.

## Default Connector

By default, the 3 pins are +, - and ground.

Power Input Definition		
Pin Number	Definition	Description
Pin 1	Positive Input	DC Power <b>Positive Terminal</b>
Pin 2	Negative Input	DC Power <b>Negative Terminal</b>
Pin 3	Ground	<b>Power System Ground</b>

*Power Connector*

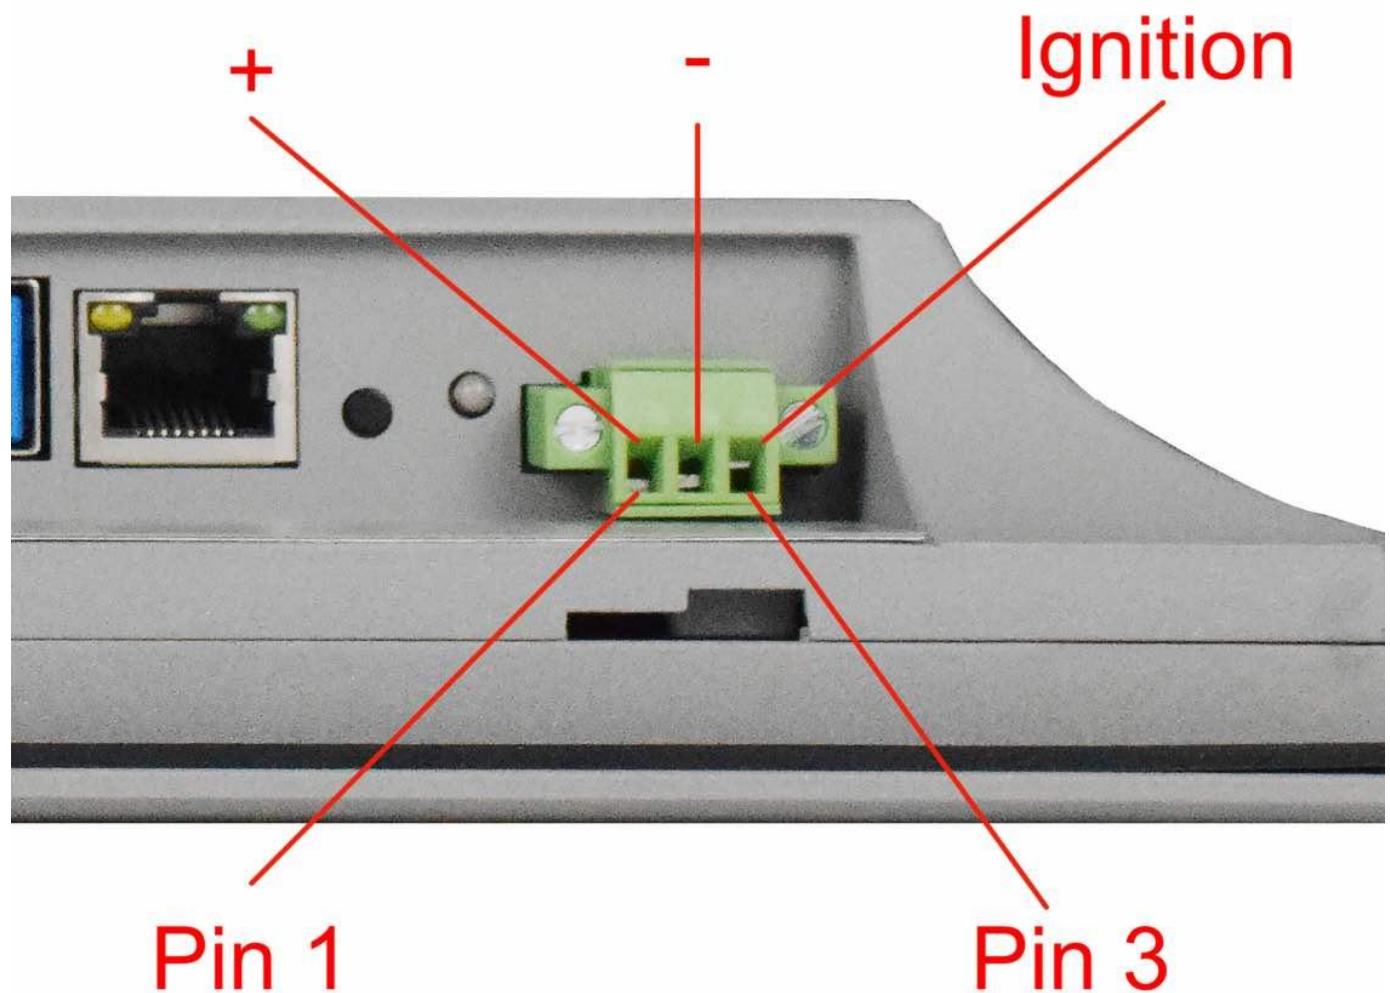

**Note**

The system ground "G" is connected to power negative "-" on board.

## Ignition Signal

The product has a “ignition signal” **optional** feature. By default the ignition signal is not installed. If you need this feature you can contact us when placing an order. In this setup, Pin 3 is the ignition signal pin.

To use this feature, apply a 24V DC input (relative to -) to Pin 3. If Pin 3 detects a low input voltage, the product will be shutdown. If Pin 3 detects a high input voltage, the product will be boot and running.

Power Input (with Ignition Signal)

Power Input Definition		
Pin Number	Definition	Description
Pin 1	Positive Input	DC Power <b>Positive Terminal</b>
Pin 2	Negative Input	DC Power <b>Negative Terminal</b>
Pin 3	Ignition	<b>Ignition Signal</b>

Power Connector with Ignition Signal

## Touch Screen

The PPC-A76-101 Industrial Panel PC uses a 10-point capacitive touch screen.

*Capacitive Touch Screen Connector*

### Attention

A capacitive touch screen is susceptible to power noise and Electromagnetic Radiation (EMR). It may cause LCD ripples or even capacitive touch malfunction. If using a capacitive multi-touch test application, you might notice the touch points float erratically across the display. There are several solutions to this problem:

1. Use a high-quality Power Adapter Unit (PSU) with low EMR. You can also provide power from a battery.
2. Make sure that the PPC-A76-101 Power Input connector (pin 3) is properly connected to the Power System Ground to provide sufficient EMI shielding and eliminate the problem entirely.
3. Bad GND problems can also be confirmed by touching pin 3 of the Power Input connector with one hand while operating the capacitive touch screen with the other hand. In this case, the operator's body acts as the Power System Ground.

# Connectivity

There are many connectivity options available on the PPC-A76-101 industrial PC. It has 2 x USB 3.0 HOST, 1 x USB Type-C, 1 x network connector (RJ45) supporting up to 1 Gbps, 8 x GPIO, 2 x CAN FD and 4 x UART terminals (RS232/485).

## RS232/RS485/CAN

The serial communication interfaces (RS485, RS232, and CAN FD) are routed to a **24-pin 3.81mm terminal**, as illustrated in the figure below.

Serial communication on both RS485 and RS232 interfaces can reach up to 115200 kbps.

### ⚠ Attention

1. The 120Ω match resistor for **CAN** bus is **NOT mounted** by default.
2. The 120Ω match resistor for **RS485** is **NOT mounted** by default.
3. RS485\_3 and RS485\_4 can control the input and output direction automatically. There's no need to control it from within the software.
4. This product supports changing 2 x RS485 to 2 x RS232, supports changing 2 x CAN to 2 x RS232, providing up to 6 x RS232 (including one debug port).

PIN2	PIN4											
CAN1_H	CAN1_L											
PIN1	PIN3	PIN5	PIN7	PIN9	PIN11	PIN13	PIN15	PIN17	PIN19	PIN21	PIN23	
CAN0_H	CAN0_L	RS485_4B	RS485_4A	RS485_3B	RS485_3A	RS232_0RX	RS232_0TX	RS232_2RX	RS232_2TX	GND	5V	

RS232 RS485 CAN Pins

The table below offers a detailed description of every pin:

RS232 / RS485 / CAN				
Pin Number	Definition	Description	CPU	OS Node
Pin 1	CAN0_H	CAN H signal	CAN1_M1	CAN0

RS232 / RS485 / CAN				
Pin 3	CAN0_L	CAN L signal		
Pin 5	RS485_4-	RS485 -(B) signal	UART0	/dev/ttyS0
Pin 7	RS485_4+	RS485 +(A) signal		
Pin 9	RS485_3-	RS485 -(B) signal	UART4	/dev/ttyS4
Pin 11	RS485_3+	RS485 +(A) signal		
Pin 13	RS232_0_RXD	RS232 RXD signal	UART6	/dev/ttyS6
Pin 15	RS232_0_TXD	RS232 TXD signal		
Pin 17	RS232_2_RXD	Debug RXD signal	UART2	/dev/ttyFIQ
Pin 19	RS232_2_TXD	Debug TXD signal		
Pin 21	GND	System Ground		
Pin 23	5V	System 5V output, up to 1A		
Pin 2	CAN1_H	CAN H signal	CAN2_M1	CAN1
Pin 4	CAN1_L	CAN L signal		

RS232/RS485/CAN

## GPIO

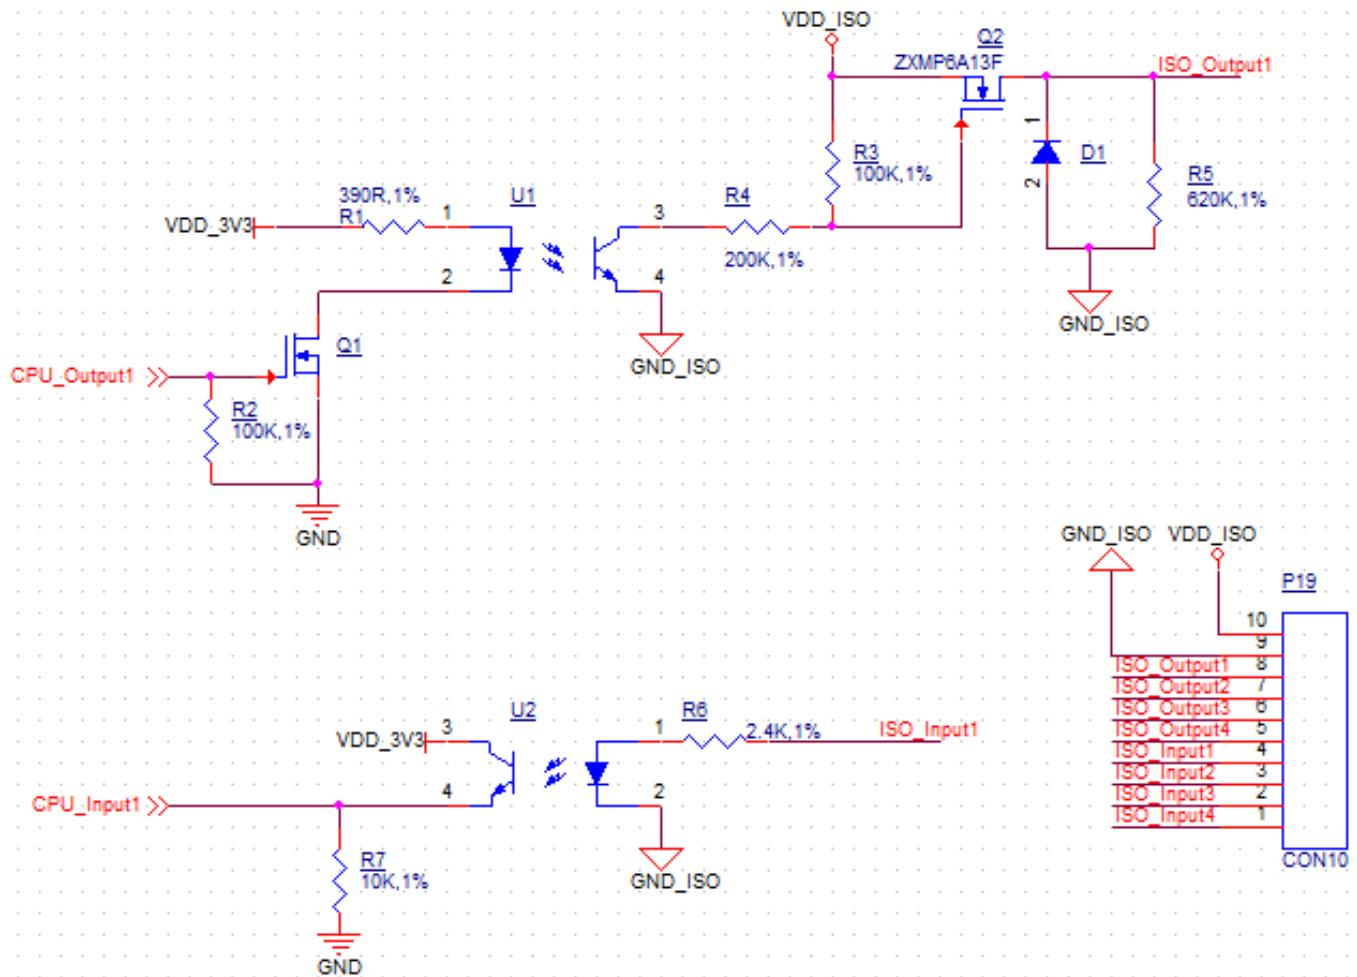

The PPC-A76-101 Industrial Panel PC features a **phoenix connector** that provides 8 x opto-isolated GPIO pins, of which 4 x are output, and 4 x are input pins.

The GPIO **HIGH** output level corresponds to the voltage connected at the isolated Power Input, while the GPIO **LOW** output level corresponds to the isolated Ground Input.

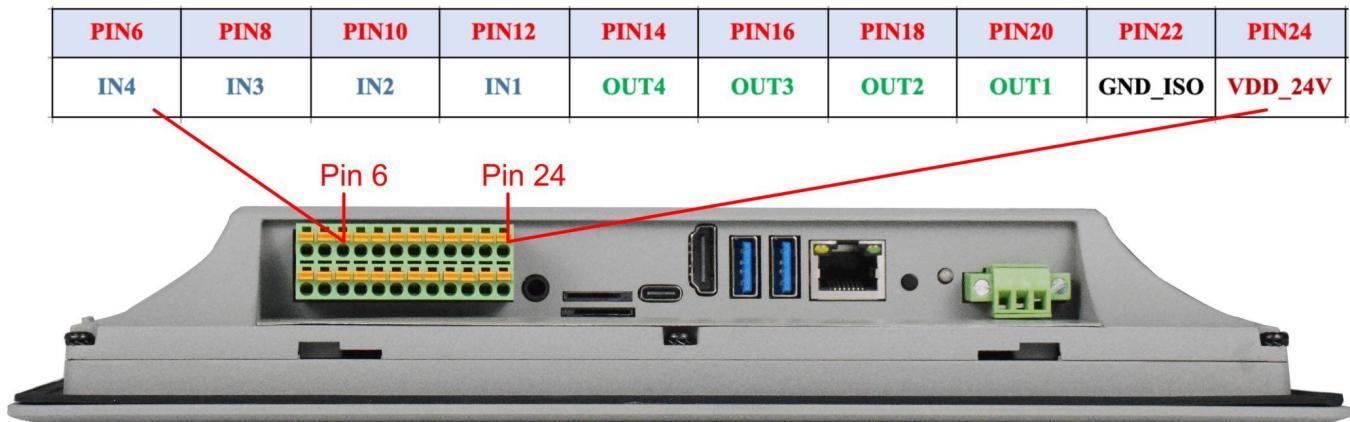

The GPIO uses the 24V logic by default. You can use an external isolated power input but the power input range should be from 5V to 24V DC.

### Attention

1. In order to use the Isolated Output, you need to add an external Isolated Power to the VDD\_ISO and GND\_ISO. The power voltage should not exceed 24V.
2. The output current can supply 500mA for every channel, but it also depends on the isolated power that is connected.
3. In order to use the Isolated Input, you need to add a signal to the InputX and GND\_ISO. A 2.4KΩ resistor has been added to limit the input current, as shown in the figure below. This resistor should work well for the 5-24V input signal. If your input signal is less than 5V, please change this input resistor. The reduced schematic is for reference purpose, if you need the precise resistor schematic, please contact us.
4. If the isolation is not a requirement, it is possible to use a non-isolated PSU instead. It is also possible to use the onboard 5V power supply: it can be re-routed to the *Isolated Power Input* pin by populating two PCB resistor footprints with 0Ω resistors. In this case, the *Isolated Power Input* pin will become an output for the onboard 5V power supply.

Isolated GPIO reduced schematic

GPIO Terminal

Pin Number	Definition	GPIO	GPIOD Chip	GPIO Line
Pin 6	IN4	GPIO1_A6_3V3	1	6
Pin 8	IN3	GPIO1_B0_3V3	1	8
Pin 10	IN2	GPIO1_B1_3V3	1	9
Pin 12	IN1	GPIO4_A6_3V3	4	6
Pin 14	OUT4	GPIO4_A7_3V3	4	7

Pin Number	Definition	GPIO	GPIOD Chip	GPIOD Line
Pin 16	OUT3	GPIO4_B0_3V3	4	8
Pin 18	OUT2	GPIO4_B5_3V3	4	13
Pin 20	OUT1	GPIO4_B6_3V3	4	14
Pin 22	GND_ISO			
Pin 24	VDD_24V			

## GPIO Pinout

## USB Connectors

There are 2 x **USB HOST** and 1 x **USB DEVICE** (for flashing OS) ports onboard: 2 x USB 3.0 HOST, 1 x USB Type-C, as shown in the figures below.

### Warning

Please unplug **USB mouse/keyboard** near HDMI when flashing OS.

The USB-A host (near HDMI port) and USB-C **can't be used** at the same time. Before boot into OS, USB-C is enabled for install OS image; after boot into OS, USB-A is enabled but USB-C is disabled. In Android, these can be configured; in Linux, these can't be configured.

*USB 3.0 HOST Port*

*USB Type-C Port***⚠ Warning**

Be careful not to touch surrounding electronic components accidentally while plugging USB devices into the embedded IPC version.

## LAN Connectors

**LAN (RJ45) connector** provides 1 x RJ45 Ethernet connectivity over standardized Ethernet cables as shown in the figure below. The integrated Ethernet interface supports up to 1 Gbps data throughput.

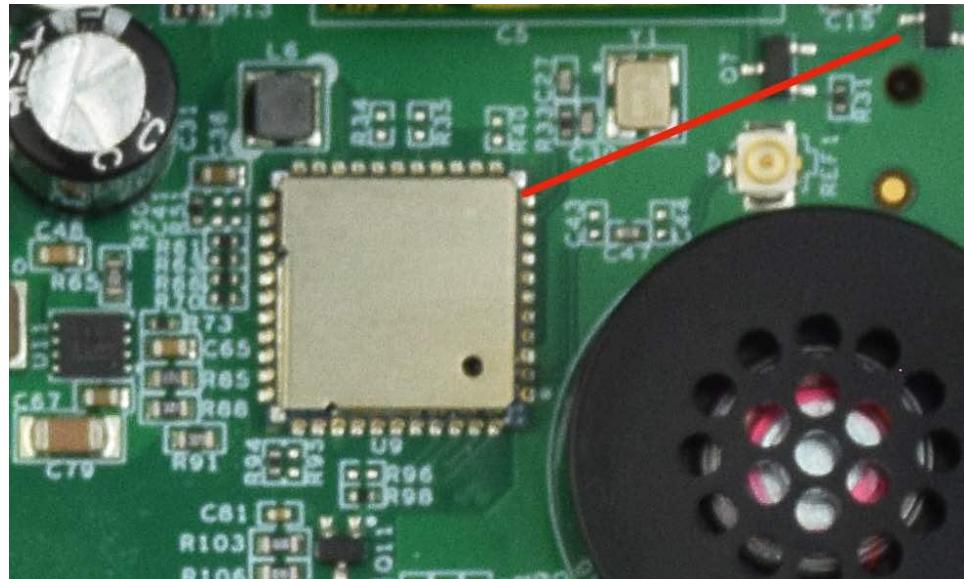

*RJ45 LAN Connector*

 **Note**

Use CAT5 or better cables to achieve full data throughput over maximum distance defined by the 1000BASE-T standard (100m).

## WiFi & BT Module

The PPC-A76-101 Industrial Panel PC is equipped with the WiFi-6 **Realtek RTL8852BE WiFi/BT** chip (through CPU PCIe lane) which supports Bluetooth V2.1+EDR/4.2/5.2, as well as IEEE802.11a/b/g/n/ac/ax 2.4/5 GHz Wireless LAN (WLAN).

*Realtek RTL8852BE Chip*

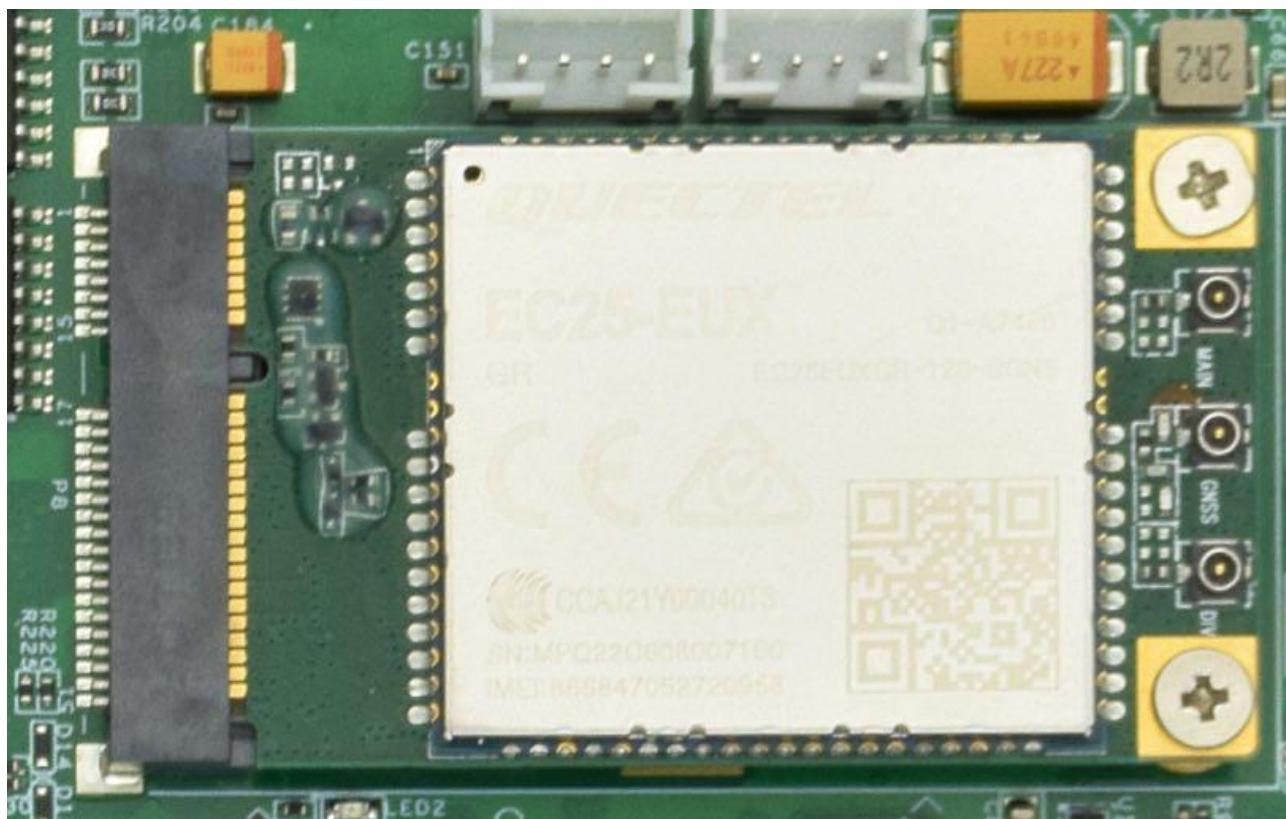

The PPC-A76-101 includes an SMA connector for an external WiFi/BT antenna, as illustrated in the figure below.

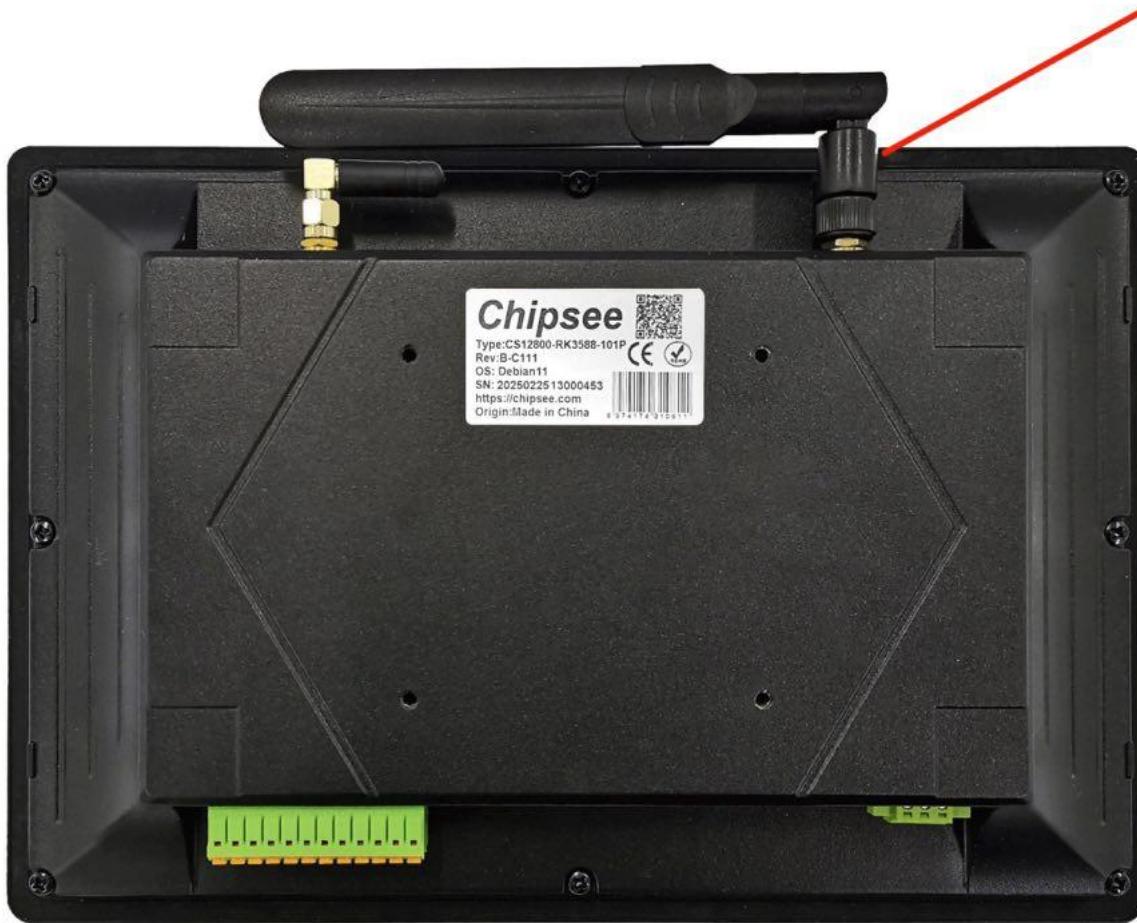

*WiFi+BT Antenna SMA*

## 4G/LTE Module

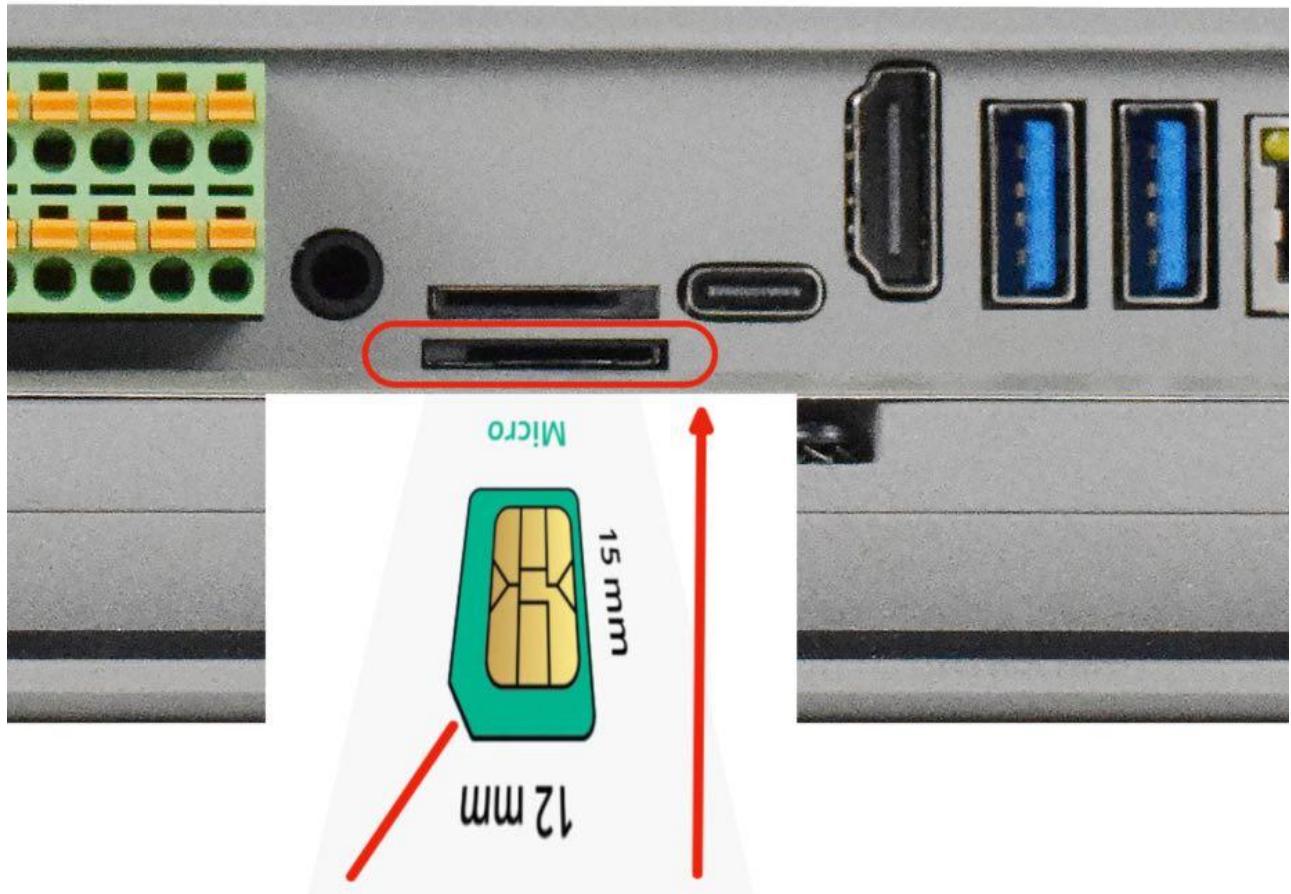

The PPC-A76-101 Industrial Panel PC is equipped with a **mini-PCIe connector** (through USB CPU lane) that can connect an **optional** 4G/LTE module. The customer will also need a SIM Card Holder and a 4G/LTE antenna connector to ensure 4G/LTE works on the PPC-A76-101. SIM card does **NOT** support hot plug. **Power off** before inserting or removing SIM card.

*Mini PCI-e and 4G/LTE Module*

4G/LTE Antenna

### *SIM Card Direction*

#### **⚠ Attention**

The product does not come shipped with the 4G/LTE module by default. The customer can choose the 4G/LTE module option when placing an order, we will install all the necessary components.

## TF Card Slot

The PPC-A76-101 Industrial Panel PC features 1 x **TF Card (micro SD) slot**. TF Card can address up to 128GB of storage.

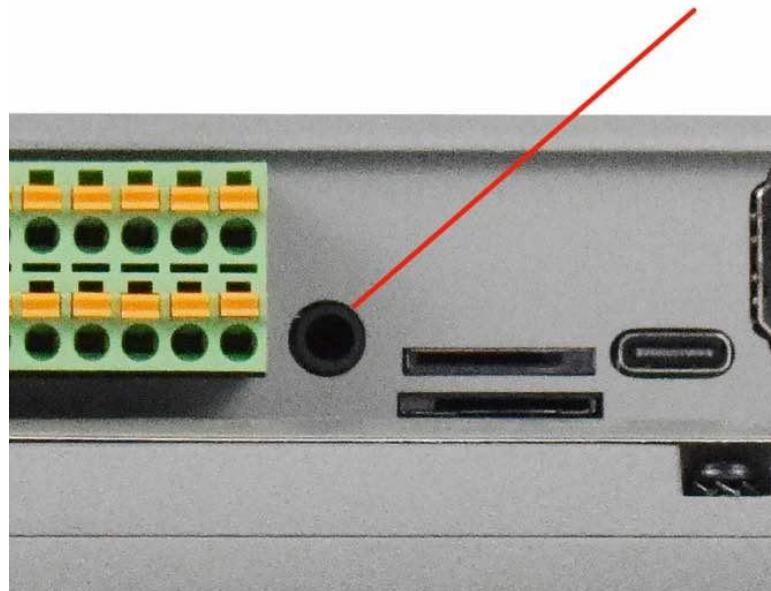

*TF (micro SD) Card Slot*

### Note

The product does not come shipped with the TF Card by default.

## Audio Connectors

The PPC-A76-101 Industrial Panel PC features some audio peripherals. It has a **3.5mm audio input/output jack**, an **internal speaker**, as well as a small **buzzer**.

*Audio Connector*

The miniature 2W embedded speaker is handy for audio reproduction, the small buzzer can play alarm/notification sounds.

*2W Micro Speaker and Buzzer*

 **Attention**

By plugging in the headphone cable, the internal speaker will be disabled automatically.

## HDMI Connector

The PPC-A76-101 Industrial Panel PC is equipped with 1 x HDMI 2.0 Out port. The HDMI connector allows connecting an additional (external) monitor. HDMI output resolution can be configured by the software.

*HDMI Connector*

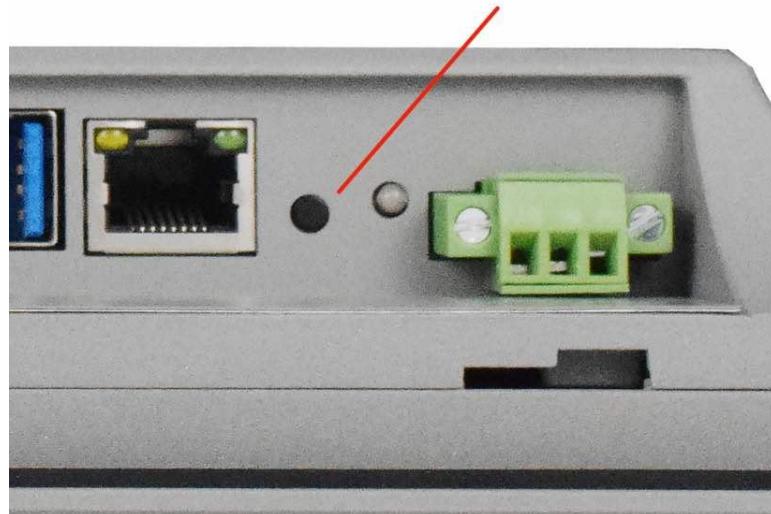

## PROG Button

The PPC-A76-101 Industrial Panel PC has one button on the board marked as PROG, as shown in the figure below.

When the button is pressed before powering up, the PPC-A76-101 will enter MASKROM mode. In this mode you can use a USB Type-C cable to upgrade its operating system. You can use this feature to flash another OS to the internal eMMC.

When the button is not pressed before and during power up, the PPC-A76-101 will boot normally.

There is no need to press the button during regular operation. However, if you need to flash the OS in MASKROM mode, the button will be used. Please refer to the [software documents](#) for more information.

*PROG Button*

# Mounting Procedure

You can mount PPC-A76-101 with VESA mounting ([guide](#)): **75 x 75** mm or **100 x 100** mm, 4 x **M4** (6mm) screws.

You can also mount PPC-A76-101 with panel mounting method ([guide](#)).

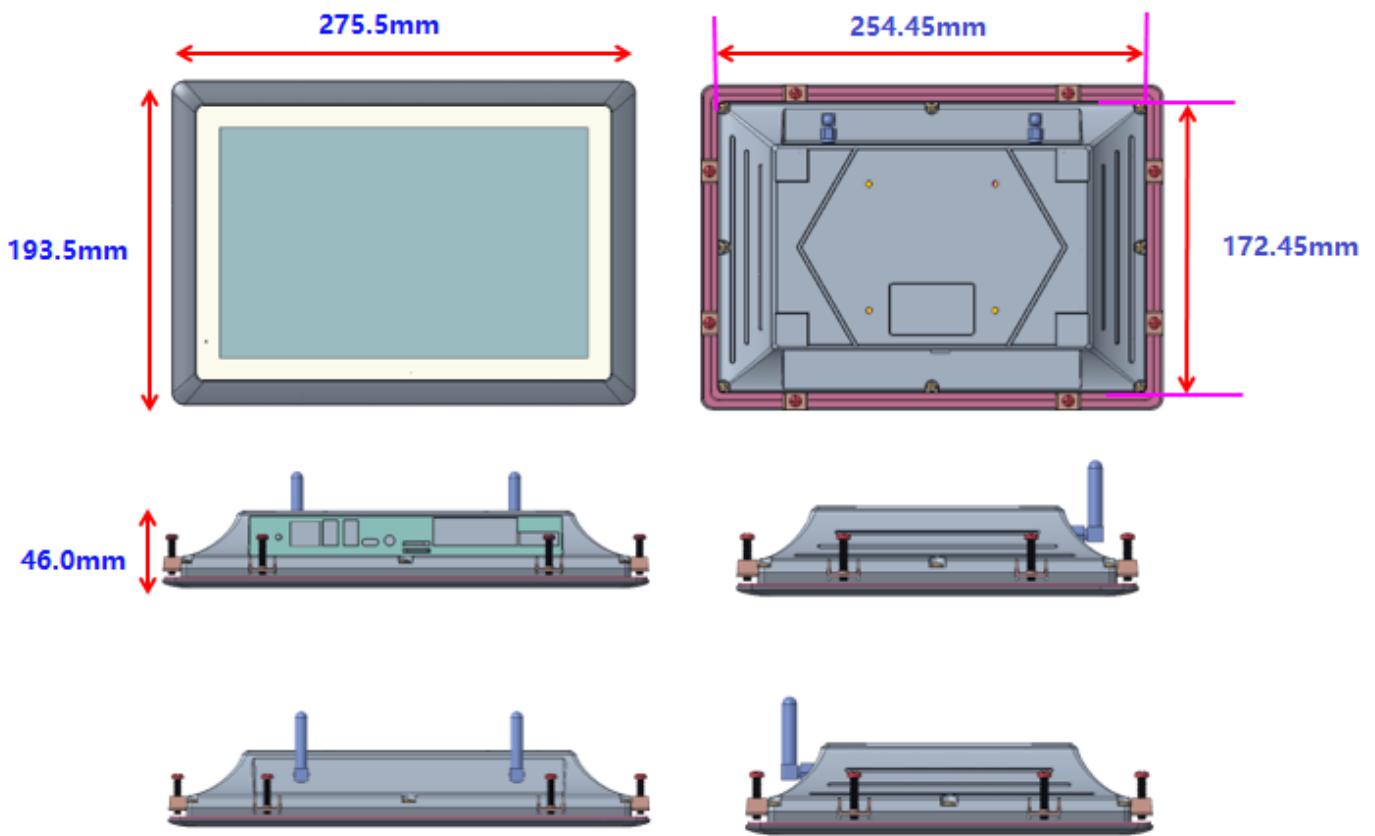

## Attention

Please make sure the display is not exposed to high pressure when mounting into an enclosure.

# Mechanical Specifications

For PPC-A76-101, the outer mechanical dimensions are 275.5 x 193.5 x 46.0mm (W x L x H).

Please refer to the technical drawing in the figure below for details related to the specific product measurements.

*Technical Drawing*
